# FUNDAMENTAL INFORMATION ABOUT THE GROUP

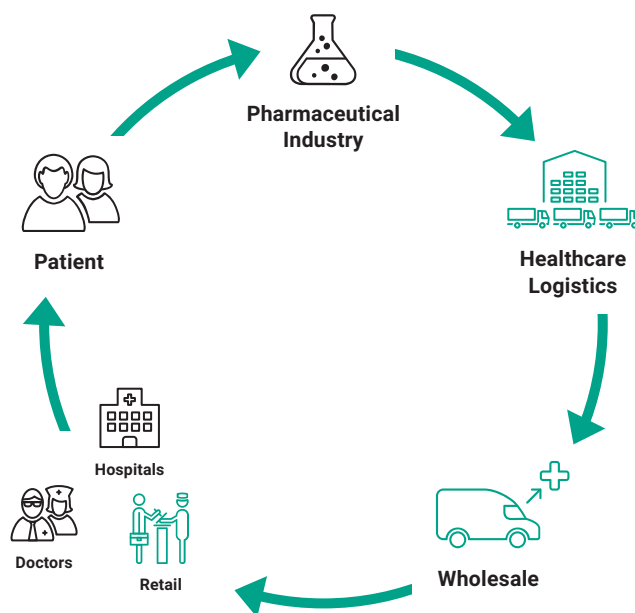

- Leading market position in European pharmaceutical wholesale
- Strategic focus on customer-oriented corporate culture, strict cost management and profit-oriented growth
- Digitalisation plays a key role
- Continuous optimisation of processes and implementation of best practices across Europe

## PHOENIX

### On its way to becoming the best integrated healthcare provider

PHOENIX Pharmahandel GmbH & Co KG, with headquarters in Mannheim, Germany, is a leading European healthcare provider and is one of the largest family businesses in both Germany and Europe. Every day, it reliably provides people with drugs and health products. Its core business is pharmaceutical wholesale and pharmacy retail. Subsidiaries also operate in related business areas, whose activities include services for the pharmaceutical industry, pharmacy goods management systems for pharmacies, and logistics solutions. PHOENIX aims to be the best integrated healthcare provider wherever it is active.

### PHOENIX: LINK BETWEEN MANUFACTURER AND PATIENT

PHOENIX is active in 27 countries in Europe and therefore has a very diversified geographic portfolio. In January 2019, we celebrated the opening of the 2,500th PHOENIX pharmacy in Czech Republic's capital Prague. Additionally, as of the end of the reporting period, the company operated 163 distribution centres in its core business.

**Family business  
active in 27 countries  
throughout Europe**

### NET TURNOVER PER REGION

in %

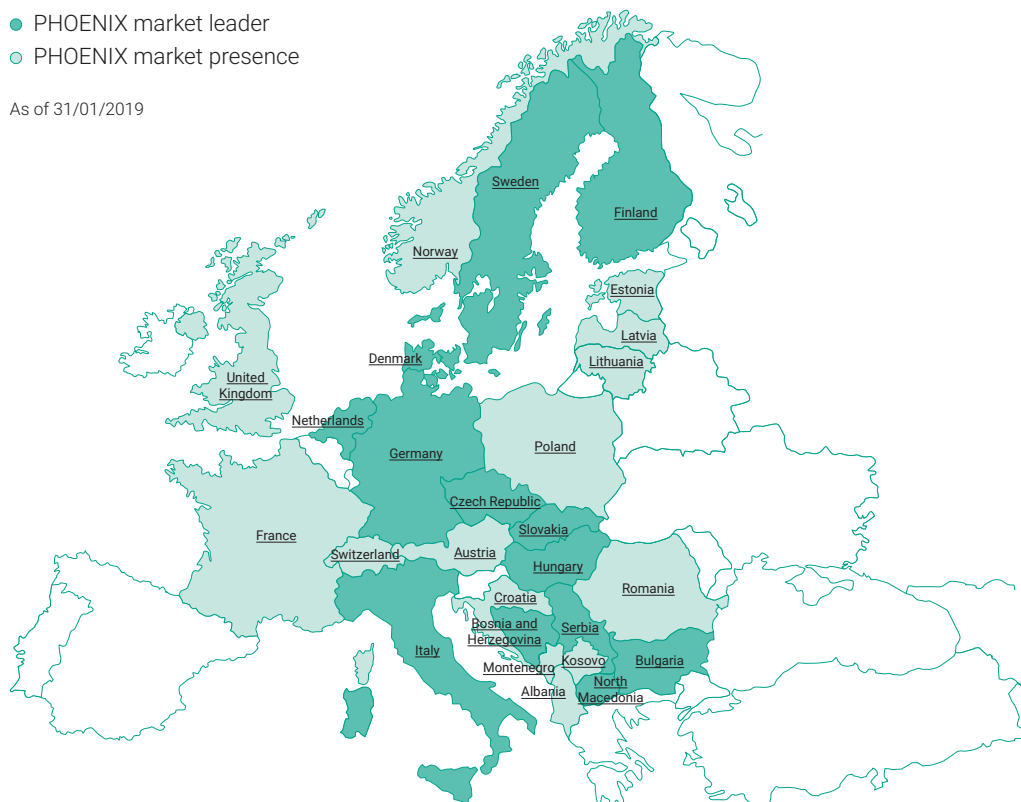

In pharmaceutical wholesale, PHOENIX is number 1 in 13 countries. It operates the pharmacy retail business mainly in the following countries: Estonia, Latvia, Lithuania, Montenegro, Netherlands, Norway, Romania, Switzerland, Serbia, Slovakia, Czech Republic, Hungary, and in the UK, making it the market leader in continental Europe. It also offers companies in the pharmaceutical industry its competencies as a service provider.

The number 1 in pharmaceutical wholesale in 13 countries.

### LEADING PHARMACEUTICAL WHOLESALER IN 13 EUROPEAN COUNTRIES

- PHOENIX market presence

As of 31/01/2019

### Our corporate mission statement defines our values

PHOENIX's corporate mission statement plays a key role in our day-to-day business. This makes the PHOENIX corporate philosophy and its vision, mission, strategy, and values transparent. As a family business, we make our own decisions and pursue a long-term strategy. Our vision of being the best integrated healthcare provider – wherever we are, can only be achieved with motivated and loyal employees. Their day-to-day activities contribute to PHOENIX's overall success. This is how we fulfil our responsibilities today and in the future.

A stable shareholder structure represents one of the strengths of PHOENIX

### Setting ourselves apart from the competition through long-term expertise

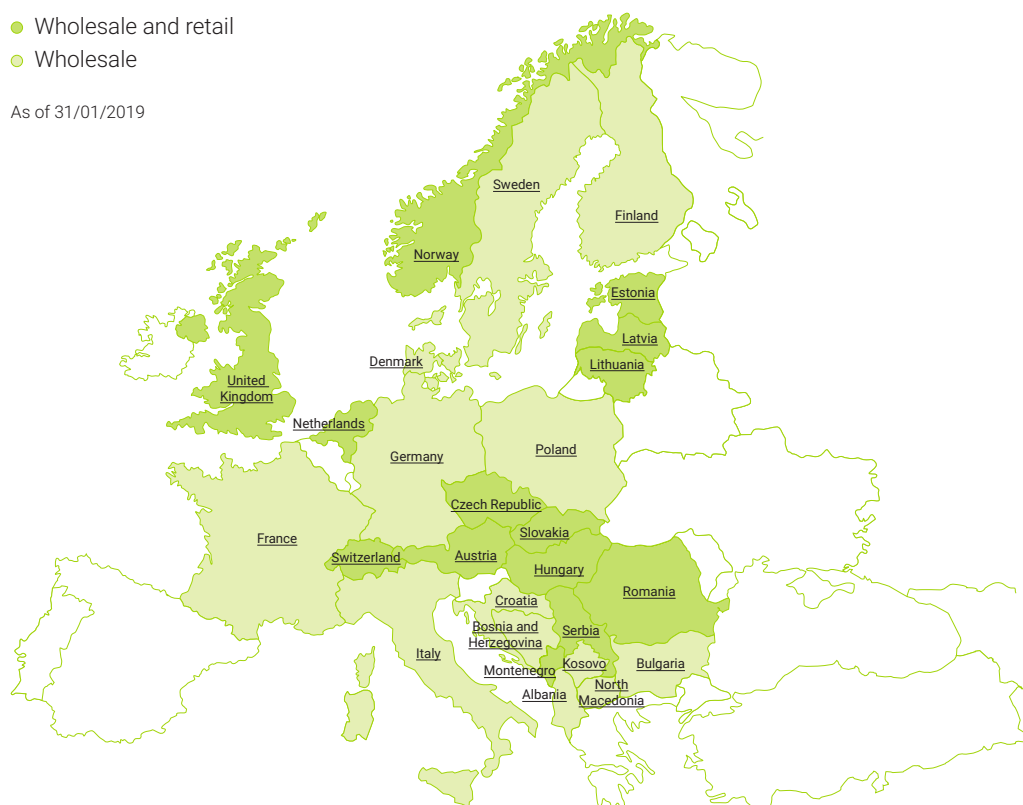

We have many unique selling points thanks to our broad positioning. PHOENIX's competitive advantages include, but are not limited to

- a unique geographical coverage across Europe thanks to our presence in 27 European countries;
- creating value added for end customers, pharmacies, hospitals, and doctors with our integrated portfolio of services;
- our well-positioned pharmacy brands across Europe: Apotek 1, BENU, Rowlands Pharmacy and Help Net;
- a pharmacy network with more than 13,500 pharmacies in PHOENIX's partnership and cooperation programmes. The PHOENIX Pharmacy Partnership functions as a Europe-wide umbrella for the cooperation programmes in 16 countries, making the PHOENIX Pharmacy Partnership the number 1 in Europe;

### PHOENIX WITH A PRESENCE IN WHOLESALE AND RETAIL IN 14 EUROPEAN COUNTRIES

- Wholesale and retail
- Wholesale

As of 31/01/2019

- our integrated services in the Pharma Services business, which we bundle under the “All-in-One” service brand;
- our long-term expertise in the relevant markets, and our excellent success rate regarding the integration of companies

## STRATEGY AND GROUP MANAGEMENT

### Successful strategy is oriented toward the long term

The activities of PHOENIX are aimed at achieving sustainable values through a corporate culture geared to the customers, strict cost management and profit-oriented growth. Market leadership and efficiency are top priorities for us. We want to address the future with a triad of “depth, breadth and digitalisation”. Specifically, this means that in the existing 27 countries, we strive to position ourselves more deeply (for example, through more pharmacies) and more broadly (for example, through added services) as well as becoming more digital.

Digitalisation, in particular, offers PHOENIX numerous opportunities to get even closer to the end customers. We intend to identify gaps in the markets and new avenues for business activity as well as drive forward the trends and innovations in the health sector. Therefore, a multidisciplinary team in the “Corporate Business Innovation” area is pursuing specific initiatives with a focus on digital health and personalised medicine. The first pilot projects have already been implemented. Having expertise at hand within the group means that the national and regional differences prevailing in the European pharmaceutical markets are addressed.

An important part of our strategy is to grow organically and through targeted acquisitions to continually expand our position in the areas of pharmacies and pharmaceutical wholesale and extend our range of services. With the acquisition of the Romanian pharmaceutical wholesaler Farmexim S.A. and the nationwide pharmacy chain Help Net Farma S.A. in the past year, we could tap into another market for PHOENIX, where we are not yet present. In doing so, we have created a good position for our company in the Romanian growth market.

In pharmaceutical wholesale, PHOENIX has partnerships with around 60,000 pharmacy customers. Many of them are part of our pharmacy cooperation programmes. With the takeover of the Romanian pharmaceutical wholesaler Farmexim S.A., the cooperation programme PHOENIX Pharmacy Partnership added a new member with Benefica. We offer franchise systems for independent pharmacies in some countries. Regular customer surveys help to maintain a strong customer focus and, in turn, high levels of customer satisfaction. With the PHOENIX Pharmacy Partnership, the number 1 in Europe, the healthcare provider created a European umbrella for its existing pharmacy cooperation programmes. With cross-border cooperation and the stronger exchange of knowledge and experience, PHOENIX with its subsidiaries offers members direct access to numerous sales and marketing services as well as purchasing advantages.

See Business development at a glance (p. 9)

See Business development at a glance (p. 12)

We want to focus on strengthening, expanding and further professionalising the pharmacy retail business. In the past few years, we have created a very good basis for this purpose with our own pharmacy brands BENU, Rowlands Pharmacy, Apotek 1 and the newly acquired pharmacy chain Help Net. Strategic measures include introducing our Europe-wide category brand LIVSANE and further increasing brand awareness in all countries. We are expanding the Pharma Services business in a targeted manner and offer the pharmaceutical industry comprehensive services along the entire pharmaceutical supply chain with our “All-in-One” service brand.

PHOENIX continuously implements best practices across Europe in all its business areas. In addition to group-wide initiatives, we mainly benefit in this regard from locally successful process optimisation measures, which serve as a starting point for improvement measures in other countries. We also make targeted investments in technology and automation wherever it appears logical to us, thereby increasing efficiency and productivity.

#### Using key financial indicators in management

The company is largely managed using the income statement and the statement of financial position as the key financial indicators. The key figures in the income statement are revenue and EBITDA; in the statement of financial position, it is the equity ratio.

## PROCESSES AND ORGANISATION

#### Ongoing optimisation increases efficiency and flexibility

We continuously review and improve our processes and structures to ensure a high level of efficiency and to provide flexibility. This enables us to respond rapidly to changes in the market and to grow profitably in the long-term.

In Germany we have initiated the “Fit for the Future” project in order to safeguard our position as market leader. This project involves optimising and harmonising processes and structures in order to achieve further gains in efficiency and includes increasing the significance of purchasing. We are implementing numerous initiatives in the United Kingdom, to strengthen our market position. In wholesale, we aim to foster further growth in the hospital sector, among others, and expand our pharmacy cooperation Numark. With “Fit4Two” in the UK, we have introduced a project to optimise internal structures and centralise services for pharmacies. The latter is also one of the priorities of the “Centralised Business Model” in Norway. Pharmacy services such as blister packaging are provided centrally.

We have continued various projects over the past few years. The “JUMP” initiative aims to optimise our operating processes and take a big step towards making our logistics network fit for the future using innovative approaches. We are also doing this by pushing the benchmarking of our distribution centres and internally sharing best practices across national boundaries. In the past year, we generated excellent results in many countries. The “SAFE” focus topic is aimed at reducing negative differences throughout the group, such as losses due to breakage and exceeded expiry dates. Our established Warehouse Excellence initiative plays an important role when it comes to identifying the causes of damage and implementing ideas for improvement that are aimed at avoiding risks. We have also incorporated the topic into our procurement strategy. With “SAFE”, we have made important progress this past year thanks to the outstanding support of our employees and are confident that we will fully achieve our targets in 2019/20.

A number of projects and initiatives throughout PHOENIX contribute to optimisations

EU Directive 2011/62/EU (EU Falsified Medicines Directive, "FMD") aimed at combating the falsification of medicines entered into force on 9 February 2019. Since then, all prescription-only medicines must bear unique identifiers in the form of a two-dimensional bar code. Furthermore, medicine packaging must include a seal aimed at preventing tampering. PHOENIX has started early with the preparations for these significant changes and has been heavily involved in this joint project between the associations of pharmaceutical manufacturers, wholesalers, and pharmacies. This approach has allowed us to legally implement the guideline on time. Our solution hinges on the PHOENIX FMD Cloud, which serves as a link to our partners' cloud-based systems.

We have also commenced Europe-wide projects for electronically transmitting batch tracking. In collaboration with the manufacturers, we have also made it our aim to digitalise the processes and continue to minimise our paper consumption in the form of invoices and receipts. With the EU falsification directive coming into force, batch tracking must be used for all RX articles as well as selected OTC articles.

### IT infrastructure continuously optimised

Following the successful completion of efforts to consolidate its IT hardware at the central data processing centre in Nuremberg, PHOENIX has turned its focus to harmonising the existing ERP architecture landscape. With this, we aim to strengthen our market position in Europe, ensure the sustainability of our successful business models and generate synergies to reduce the high number of existing technologies. In the past year, we performed a detailed analysis of all the different goods management systems in operation within the group in terms of their current benefits and their future viability. Building on this, we developed a holistic strategy to modernise and gradually consolidate the countries' goods management systems in the coming years.

Harmonising the  
ERP systems  
strengthens the  
market position  
in Europe

In parallel, PHOENIX further developed the local IT systems to implement new legal requirements such as the EU falsification directive (FMD) as well as to optimise operating processes. For example, some 17% of all the invoices and credit notes PHOENIX receives in Germany are electronic, thus saving the company more than 15,000 paper receipts each month.

We have optimised finance processes across the group under the banner "FAME" (Finance and Accounting Measures). The IT department supported this by determining and presenting KPIs and automating work processes such as invoice verification.

Communication with all employees is also to be improved in future by creating new communication channels via a mobile internal social network. A corresponding project with pilot applications in Finland, the Netherlands and Switzerland was successfully concluded. PHOENIX also commenced a project to modernise and standardise the communication infrastructure including phone calls, video conference systems, and computer workstations.

# ECONOMIC REPORT

- Economic growth more moderate
- Market conditions still characterised by strong competition
- Important milestones reached in fiscal year 2018/19
- Total operating performance, revenue and EBITDA up on the prior year
- Goodwill impairment in the United Kingdom and in the region Bosnia/North Macedonia/Serbia
- High participation in employee survey

## ECONOMIC ENVIRONMENT

### Overall economic dynamic eases up somewhat

The European economy again recorded growth in 2018, albeit not so strong as in 2017. The gross domestic product (GDP) in the eurozone was up 1.8% on the prior year (prior year: 2.5%). The German economy was also weaker than in the prior year, with GDP (adjusted for price and calendar effects) up 1.5% (prior year: 2.5%).

Development in the European pharmaceutical markets was varied. The German pharmaceutical wholesale market increased 2.7% in 2018 compared to the prior year. This was primarily attributable to a noticeable increase in revenue from prescription-only drugs. The German market continued to be shaped by fierce competition.

## BUSINESS DEVELOPMENT AT A GLANCE

### Leading position in the European pharmaceutical wholesale sector

The healthcare sector continues to grow, especially on account of demographic changes. Europe's pharmaceutical wholesale sector is experiencing increasing consolidation. PHOENIX stands to benefit from this thanks to its broad positioning. Growing pressure on prices within Europe's healthcare systems, on the other hand, is also an increasingly important factor for the pharmaceutical wholesale business in particular. PHOENIX is countering this effect in all countries with diverse measures to improve earnings and efficiency such as the Warehouse Excellence, "Fit for the Future" and "Fit4Two" initiatives, as well as "SAFE" and "FAME".

At the same time, we are driving forward the development of innovative business models with the Corporate Business Innovation division. We are on the lookout for innovative approaches to improve healthcare for the good of mankind. We have our focus on the following three areas in particular: designing and implementing customer-oriented product, service, and business model innovations; performing trend/market analyses, and fostering an innovative culture within PHOENIX. In terms of content, the focus is currently on specific initiatives for the prioritised areas of digital health and personalised medicine. In this connection, we have started working with start-ups as well as an

See Processes and organisation (p. 7)

international research institution. We are continuing to actively expand the network of external innovation partners. In Finland, a new kind of service for healthcare institutions and residential care is about to be launched on the market involving a self-developed robot (blister dispenser) that helps patients take their medication thanks to various sensors and measuring instruments. It automatically measures the correct dosage and is constantly in contact with doctors and nursing staff.

PHOENIX focused on expanding its services in fiscal year 2018/19. This included the ongoing development of its various pharmacy cooperation programmes.

PHOENIX' network of more than 13,500 independent pharmacies in its cooperation and partner programmes is the largest of its kind in Europe. This partnership is part of the services provided by PHOENIX' "All-in-One" service brand. The PHOENIX Pharmacy Partnership acts as a Europe-wide umbrella for PHOENIX's 13 pharmacy cooperation programmes in 16 different countries. The cooperation programme PHOENIX Pharmacy Partnership is being continually refined thanks to the dedicated work of pharmacists on the internationally staffed Advisory Board. In the past fiscal year, the pharmacy network added another member with the Romanian pharmacy cooperation programme Benefica. Once a year the managers of the 13 pharmacy cooperation programmes come together at the International Pharmacy Cooperation Programmes (IPCP) meeting to discuss the development of the individual programmes and the network. At the last IPCP in 2018, the company also concluded a communication plan aimed at further increasing the awareness of the PHOENIX Pharmacy Partnership at a local and central level in the business-to-business area. In cooperation with "All-in-One", the aim is also to directly address the target group of the pharmaceutical manufacturers.

Together with our subsidiary ADG, we launched the new app "deine Apotheke" (your pharmacy) on the market in the reporting year. With this app, PHOENIX will in future be able to offer all pharmacies in Germany an innovative digital service package comprised of two components to support sales. Firstly, the PHOENIX app "deine Apotheke" allows end customers to quickly and easily get their prescriptions and order medicines or health products directly from their pharmacy. Secondly, PHOENIX offers exclusive access to Germany's widest-reaching bonus programme PAYBACK. We are looking to further internationalise ADG, which produces tills, goods management and management systems. In addition to using the potential in the existing markets, additional attractive markets outside Germany are to be tapped for further growth. With "Vamos", ADG has developed a new approach for pharmacy inventory management in the digital age. Specifically, this relates to the topic of Vendor Managed Inventory (VMI). The core of the consulting services lies in the optimisation of the goods management processes within the pharmacy and at PHOENIX as the wholesale supplier. Furthermore, we bundle all activities in the business areas pharmacy software, hardware and services under the Europe-wide umbrella brand Pharmacy Solutions.

Innovative digital  
service package launched  
for all pharmacies

### Pharmacy retail business continues to grow

PHOENIX's pharmacy retail business again recorded strong growth in the past fiscal year. At the end of fiscal year 2018/19, the company had more than 2,500 pharmacies and was the market leader in numerous countries. The number of pharmacies thus increased by more than 400 compared to the prior year. With the expansion to Romania and the acquisition of the Romanian pharmacy chain Help Net with around 220 pharmacies, PHOENIX tapped into its 14th retail market in the past year. The acquisition of the pharmacy chain "Goodwill Apoteka" in the prior year and the related increase in the number of pharmacies in Serbia by some 140 to more than 300 mean that PHOENIX has since become market leader in retail.

For our largest pharmacy brand BENU, we developed a new store concept for the whole of Europe in the past year. We successfully implemented this concept for the first time in December 2018 at a branch in Budapest. With modern styling and natural materials such as decorative elements and slats made out of wood, the new open room design offers a pleasant shopping atmosphere. In Prague, the company opened a new concept store at the end of January 2019 and at the same time its 2,500th pharmacy.

PHOENIX is also realigning its category brand business. In 2017, we successfully launched "LIVSANE", our first Europe-wide category brand for all pharmacies, on the market. The healthcare products have since been introduced gradually in 14 European countries. The product portfolio is aimed at independent pharmacies in the PHOENIX cooperation programmes as well as at individual pharmacies that the company supplies as part of its pharmaceutical wholesale business. Furthermore, PHOENIX sells LIVSANE products via its own pharmacies. Additional countries and markets are to be added to this in future. The product range is also to be expanded to some 500 products. We founded PXG Pharma GmbH as a subsidiary of PHOENIX in order to realign the supply chain in its category brand business and better bundle volumes in future.

The company is also working on the increasing digitalisation and further development of sales channels. For example, by expanding its e-commerce activities, PHOENIX has improved its market position in the Czech Republic significantly, where it is among the top 3 online retailers. Based on the Czech model, the online shop in Slovakia is being restructured and professionalised. PHOENIX also operates a very successful online shop in Norway. Further shops are set to follow in the Baltic countries.

Increasing digitalisation  
is also a focal point in  
the pharmacy retail sector

### Pharma Services expands services for the pharmaceutical industry

Pharma Services offers numerous services for the pharmaceutical industry under the "All-in-One" service brand, uniting all those involved in the healthcare system for the benefit of the consumer. In fiscal year 2018/19, Pharma Services continued to develop its targeted and customer-oriented services.

Since opening its new location in Brno (Czech Republic), the "Healthcare Logistics" network with the "CEE (Central Eastern Europe) Bridge" solution has grown to four hubs – Brno, Belgrade, Prague, and Warsaw. With these new modern logistics centres, as well as the construction of the largest pre-wholesale warehouse and distribution centre in Køge, Denmark, PHOENIX is reinforcing its position in the European pharmaceutical logistics sector.

With the help of new patient-centred healthcare models, the quality of life of consumers is being increased thanks to improved treatment management. For example, this had led to Pharma Services implementing a new programme for caring for cancer patients in Germany, which uses the newest methods for providing patients with optimal support together with doctors, pharmacists, and health insurance companies.

The company also focused on expanding its partnerships. In the reporting year, the company concluded five new partnerships with various companies and also expanded and extended existing partnerships.

In order to offer customers a comprehensive service in providing care with special (oncological) drugs, PHOENIX is working on new sales models in the "Specialty" area. The aim is to support our customers while also meeting the high requirements of our industry partners. PHOENIX' many years of expertise in the areas of healthcare logistics and wholesale is serving it well here. PHOENIX is able to fall back on a large network. In 2019, we will implement our new Europe-wide sales solutions for numerous manufacturers of high-priced drugs, standing by as a strategic partner for them upon entering the European market.

#### Acquisitions account for significant share of profitable growth

Targeted acquisitions in the core business, i.e. in the wholesale, retail, and service area, are making a crucial contribution to PHOENIX's sustainable growth. Business acquisitions in fiscal year 2018/19 led to a cash outflow of EUR 148.9m (prior year: EUR 38.8m). Cash received from divestitures amounted to EUR 0.4m (prior year: EUR 12.2m).

As of 31 July 2018, PHOENIX acquired the Romanian pharmaceutical wholesaler Farmexim S.A. as well as the nationwide pharmacy chain Help Net Farma S.A. With this, PHOENIX has tapped into an attractive new market. We now serve customers in a total of 27 countries across Europe. With over 700 employees and 10 national distribution centres, Farmexim is one of Romania's largest pharmaceutical wholesalers. The pharmacy chain Help Net operates around 220 pharmacies and employs some 1,400 workers. The two companies are well-established players in Romania's pharmaceutical wholesale and retail markets.

The business acquisitions of the prior fiscal year have now largely been completed. The pharmacy chain "Goodwill Apoteka" in Serbia is fully integrated and all pharmacies now operate under the BENU name. Medaffcon Oy was also successfully integrated. The Finnish company operates in the fields of research and consulting for the pharmaceutical industry and healthcare sector. The company largely draws on health-related information from biobanks, clinics, and a central register base. So-called text mining tools are used to gain information from unstructured data which, among other things, allows risks to be recognised at an earlier stage. We are planning to extend the business model to other countries.

—  
12  
—  
Successful entry into the Romanian market through most recent acquisitions

### Investments help secure the company's sustainability

Investments in intangible assets and property, plant and equipment are an important part of PHOENIX's corporate strategy. In the past two years, PHOENIX has invested around half of its operating result in expanding and modernising its pharmacy network and distribution centres, in automation technology and logistics services for the pharmaceutical industry. Investments primarily relate to replacement and restructuring investments and less so to expansion investments. In fiscal year 2018/19, investments amounted to EUR 174.7m. PHOENIX's ONE project involves building a ground-breaking pre-wholesale warehouse and distribution centre in the Danish town of Køge. The modern high-rack warehouse will offer space for around 60,000 pallets, including those for anaesthetics and products requiring a controlled ambient temperature. The associated volume of investment amounts to more than EUR 70m, making it one of the company's most important investments. We have made other key investments in Norway, where we put intensive pharmacy-related work into central locations, blister centres or warehouses. The new distribution centre in Gotha, Germany, was also put into operation. In the Finnish city of Tampere, PHOENIX's newest OSR (Order Storage Retrieval System) was put into operation in the first quarter of 2018/19. This investment has allowed us to expand capacities, make batch tracking possible and cope with the growth in the Finnish market. The new OSR comprises around 4,000 pallet spaces and additional picking stations, thereby boosting efficiency and increasing the number of customers served. In the Czech Republic, we are currently planning the new construction of the wholesale location in Prague as part of the "Project 2020". The primary aims are automation and increasing efficiency. We also continue to pursue the successful strategy of automating slow-moving items in countries such as Germany and Italy with a large variety of products. To achieve this, PHOENIX has also installed automatic pharmacy dispensers in Bielefeld alongside Gotha, Leipzig, and Hanover. These dispensers also lower costs and increase efficiency. Further investments related to the implementation of batch tracking, which has been a legal requirement since 9 February 2019. This system has allowed us to increase both stability in our supply chain and also security for patients.

For 2019, PHOENIX has approved a modernisation and maintenance plan containing further measures for modernisation, automation, and building maintenance.

A modernisation and maintenance plan has been adopted for 2019

### Management's overall assessment of the situation

PHOENIX was again able to successfully further strengthen its market position in fiscal year 2018/19 as a leading healthcare services provider in Europe and expand its wholesale and retail activities. Despite challenging conditions, PHOENIX has managed for the ninth time in a row to grow at a higher rate than the overall market and increase its total operating performance and revenue once again, thereby achieving our forecast for the past fiscal year. In connection with Brexit as well as the deductions in pharmacy remuneration by legislators, we assessed the recoverability of our activities in the United Kingdom and recognised impairments as necessary. In the Balkan countries we also lowered the medium-term earnings forecast due to the change in market conditions.

## FINANCIAL PERFORMANCE

	FY 2017/18 in EUR m	FY 2018/19 in EUR m	Change in EUR m	Change in %
Total operating performance	31,526.2	33,045.1	1,518.9	4.8
Revenue	24,909.8	25,812.2	902.4	3.6
EBITDA	455.0	452.8	-2.2	-0.5
EBIT after goodwill impairment	308.0	26.3	-281.7	-91.5
EBIT before goodwill impairment	322.0	305.8	-16.2	-5.0
Financial result	-50.6	-43.7	6.9	-13.6
Profit before tax	257.5	-17.4	-274.9	-106.8
Profit or loss for the period after goodwill impairment	180.2	-97.6	-277.8	-154.2
Profit or loss for the period before goodwill impairment	194.2	181.9	-12.3	-6.3
Equity	2,840.0	3,144.8	304.8	10.7
Equity ratio (%)	34.1	36.2	2.1	6.2
Net debt	1,569.1	1,451.2	-117.9	-7.5

### Total operating performance and revenue increased significantly

Total operating performance, which comprises revenue and handled volume recognised as revenue but instead charged as a service fee, increased by 4.8% to EUR 33,045.1m in fiscal year 2018/19. Adjusted for foreign exchange rate effects, the growth amounts to 5.6%.

Revenue increased by 3.6% to EUR 25,812.2m in fiscal year 2018/19 (prior year: EUR 24,909.8m). We achieved growth in all regions. This development is in line with the statement made in the forecast report of the 2017/18 group management report, where we expected revenue to be slightly above the level of growth on the European pharmaceutical markets. Adjusted for foreign exchange rate effects, the increase in revenue came to 4.2%. 1.4% stemmed from changes in the basis of consolidation.

Forecasts achieved for  
financial year 2018/19

### DEVELOPMENT OF SALES

EUR m

Revenue by region (before consolidation) breaks down as follows:

	FY 2017/18 in EUR m	FY 2018/19 in EUR m	Change in EUR m	Change in %
Germany	8,666.4	8,922.3	255.9	3.0
Western Europe	8,492.7	8,496.7	4.0	0.0
Eastern Europe	3,576.0	4,206.5	630.5	17.6
Northern Europe	4,236.6	4,256.1	19.5	0.5

### Adjusted EBITDA higher than in the prior year

Gross income increased by EUR 115.6m to EUR 2,624.0m. The gross profit margin, calculated as gross profit in relation to revenue, increased from 10.07% to 10.17%. This rise can be attributed mainly to an improved cost-of-sales ratio. Pressure on margins primarily in the United Kingdom caused by market conditions had the opposite effect.

Gross margin increases  
despite persistent  
margin pressure

Personnel costs rose from EUR 1,342.4m to EUR 1,420.8m. Adjusted for currency effects, personnel expenses increased by 6.7% on the prior year. This increase is attributable to acquisitions, collectively bargained wage increases, and an increase in headcount due to the expansion of business.

Other expenses increased by EUR 45.7m to EUR 919.1m. This was primarily attributable to higher transport costs, IT costs, consulting fees, rental expenses as well as a loss from the deconsolidation of an equity investment. In relation to revenue, other expenses came to 3.6% (prior year: 3.5%).

Earnings before interest, taxes, depreciation, and amortisation (EBITDA) stood at EUR 452.8m, down slightly on the prior-year level as forecast (prior year: EUR 455.0m).

Adjusted EBITDA of EUR 491.0m was up EUR 7.0m on the prior-year figure and was calculated as follows:

	FY 2017/18 in EUR k	FY 2018/19 in EUR k	Change in EUR k	Change in %
EBITDA	454,967	452,769	-2,198	-0.5
Interest from customers	10,127	9,608	-519	-5.1
Factoring fees	2,309	1,318	-991	-42.9
Other non-recurring effects	16,879	27,605	10,726	63.5
<b>Adjusted EBITDA</b>	<b>484,282</b>	<b>491,300</b>	<b>7,018</b>	<b>1.4</b>

### Goodwill impairment

Amortisation of intangible assets and depreciation of property, plant and equipment amounted to EUR 138.0m (prior year: EUR 131.8m). The increase is primarily due to acquisition effects and investments.

At EUR 288.4m, impairment of intangible assets was up EUR 273.3m on the prior year. This was largely due to goodwill impairment of EUR 279.5m (prior year: EUR 14.0m) and impairment on pharmacy licences of EUR 8.1m (prior year: EUR 0.8m). Goodwill impairment relates to the cash-generating units United Kingdom and Bosnia/North Macedonia/Serbia. In the United Kingdom, the deductions in pharmacy remuneration by legislators, as well as uncertainties relating to Brexit, resulted in a reduction in future earnings forecasts and thus to an impairment of goodwill. An extensive optimisation programme was launched aimed at improving the earnings situation in the medium term. The goodwill of the cash-generating unit Bosnia/North Macedonia/Serbia also had to be impaired due to the reduction in future earnings forecasts.

Goodwill impairment affects  
United Kingdom and  
Bosnia/North Macedonia/  
Serbia regions

The effects described resulted in earnings before interest and taxes (EBIT) of EUR 26.3m overall (prior year: EUR 308.0m). EBIT before goodwill impairment amounted to EUR 305.8m compared to EUR 322.0m in the prior year. The return on sales based on EBIT before goodwill amounted to 1.19% (prior year: 1.29%).

### Financial result improves

Despite impairment of financial assets of EUR 14.3m (prior year: EUR 3.2m), the financial result improved from EUR – 50.6m to EUR – 43.7m. In the prior year, the financial result contained a negative effect of EUR 12.2m as a result of redeeming bonds with a nominal value of EUR 100.0m.

Earnings before income tax amounted to EUR – 17.4m (prior year: EUR 257.5m).

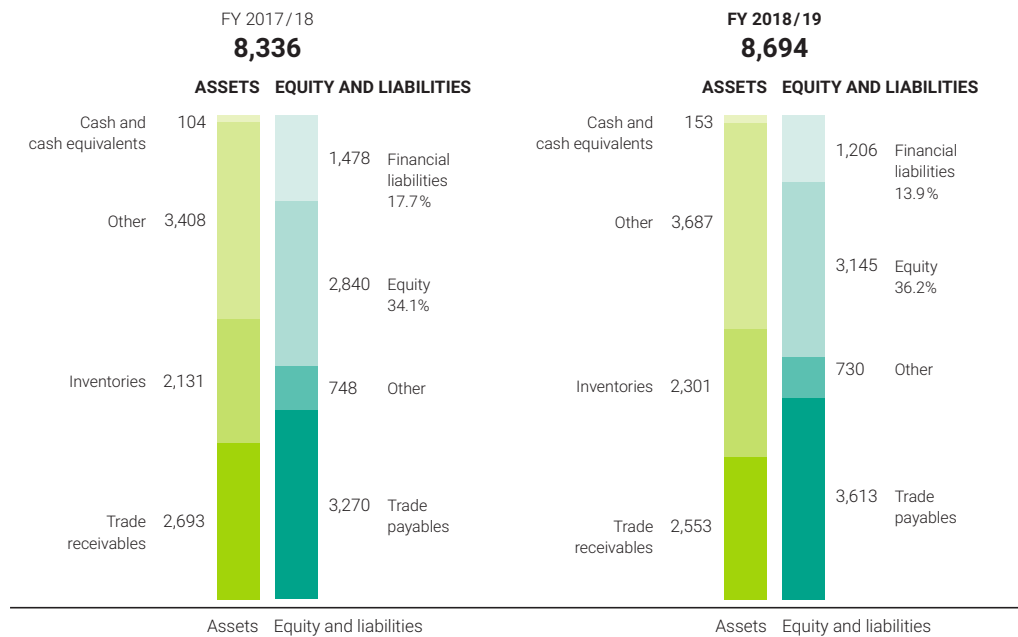

Income tax amounted to EUR 80.2m (prior year: EUR 77.3m) and contained expenses from current taxes of EUR 64.3m (prior year: EUR 65.3m) as well as deferred tax expenses of EUR 15.9m (prior year: EUR 11.9m). The ratio of tax expense to earnings before income tax of – 460.3% (prior year: 30.0%) results particularly from the non-tax-deductible goodwill impairment as well as the exhaustion of tax loss carryforwards.

Profit/loss for the period came to EUR – 97.6m (prior year: EUR 180.2m), of which EUR 40.2m (prior year: EUR 30.3m) was attributable to non-controlling interests. Profit/loss for the period before goodwill impairment amounted to EUR 181.9m compared to EUR 194.2m in the prior year.

The profit/loss attributable to the equity holders of the parent in fiscal year 2018/19 amounted to EUR – 137.8m (prior year: EUR 149.9m).

## STRUCTURE OF THE STATEMENT OF FINANCIAL POSITION

EUR m

## ASSETS AND LIABILITIES

The group's total assets increased by 4.3% to EUR 8,693.8m. The currency translation difference on total assets amounted to EUR –100.6m (prior year: EUR –96.3m).

Intangible assets decreased by EUR 139.3m to EUR 1,837.8m. This is primarily due to goodwill impairment in the United Kingdom and the region Bosnia/North Macedonia/Serbia totalling EUR 279.5m. This was counterbalanced by acquisition effects of EUR 142.0m. As of 31 January 2019, intangible assets essentially comprised goodwill (EUR 1,460.3m; prior year: EUR 1,601.3m) and pharmacy licences (EUR 287.3m; prior year: EUR 295.1m).

As a result of acquisitions, inventories increased in comparison to the prior year by 8.0% to EUR 2,301.0m. The average number of days sales of inventory rose slightly from 32.0 to 32.9 days.

Trade receivables decreased from EUR 2,693.3m in the prior year to EUR 2,552.6m. The average number of days of sales outstanding remained more or less unchanged at 41.0 (prior year: 41.1).

Receivables amounting to EUR 302.4m had been sold as of 31 January 2019 (prior year: EUR 61.2m) under ABS and factoring programmes that are not accounted for in the statement of financial position. Under ABS and factoring programmes that are accounted for only to the extent of the continuing involvement, receivables of EUR 169.2m had been sold as of 31 January 2019 (prior year: EUR 177.1m). The group's continuing involvement came to EUR 8.5m (prior year: EUR 8.2m).

Other receivables and other current financial assets amounted to EUR 501.1m (31 January 2018: EUR 167.1m) and contain a purchase price loan to PHOENIX Pharma SE of EUR 345.0m as of 31 January 2019 (31 January 2018: EUR 0.0m).

## FINANCIAL POSITION

The objective of financial management is to ensure a sound capital structure to finance the operating business.

### Increase in equity

Equity increased from EUR 2,840.0m as of 31 January 2018 to EUR 3,144.8m as of 31 January 2019. The equity ratio rose from 34.1% in the prior year to 36.2%, developing better than forecast. The increase is primarily attributable to the sale of treasury shares of EUR 266.5m as well as to the partners waiving receivables from the payment of interest of additional contributions of EUR 192.2m. The profit for the period of EUR –97.6m had a contrasting effect.

	FY 2017/18 in EUR m	FY 2018/19 in EUR m	Change in EUR m	Change in %
Profit or loss for the period	180.2	–97.6	–277.8	–154.2
Non-cash expenses/income, non-cash payments	204.0	502.5	298.5	146.3
Change in working capital	–173.0	–47.7	125.3	–72.4
<b>Cash flow from operating activities</b>	<b>211.2</b>	<b>357.2</b>	<b>146.0</b>	<b>69.1</b>
<b>Cash flow from investing activities</b>	<b>–220.4</b>	<b>–212.3</b>	<b>8.1</b>	<b>–3.7</b>
<b>Free cash flow</b>	<b>–9.2</b>	<b>144.9</b>	<b>154.1</b>	<b>–1,675.0</b>

Cash flow from operating activities came to EUR 357.2m (prior year: EUR 211.2m), which was largely affected by a lower increase of EUR 125.3m in working capital compared to the prior year. Cash flow from investing activities came to EUR –212.3m (prior year: EUR –220.4m).

Free cash flow improved from EUR –9.2m in the prior year to EUR 144.9m. For the change in free cash flow and cash and cash equivalents, please refer to the statement of cash flows.

Provisions for pensions increased from EUR 235.0m in the prior year to EUR 249.6m in the reporting year.

Non-current financial liabilities came to EUR 662.3m (prior year: EUR 655.8m). This item includes bonds of EUR 497.6m (prior year: EUR 496.3m) as well as a promissory note issued in October 2016 for a nominal value of EUR 150.0m, term to maturity of up to seven years, and a carrying amount of EUR 149.7m (prior year: EUR 149.6m).

Current financial liabilities fell by EUR 279.3m to EUR 543.3m in particular due to a fall in liabilities from ABS and factoring agreements.

Current financial liabilities include liabilities to banks of EUR 137.5m (prior year: EUR 179.3m), liabilities from ABS and factoring agreements of EUR 213.6m (prior year: EUR 415.0m) as well as other loans of EUR 116.2m (prior year: EUR 116.0m).

According to the calculation below, total net financial liabilities decreased from EUR 1,569.1m to EUR 1,451.2m.

	FY 2017/18 in EUR k	FY 2018/19 in EUR k	Change in EUR k	Change in %
+ Financial liabilities (non-current)	655,783	662,282	6,499	1.0
– Derivative financial instruments (non-current)	– 229	– 187	42	– 18.3
+ Financial liabilities (current)	820,954	543,324	– 277,630	– 33.8
– Derivative financial instruments (current)	– 2,292	– 5,733	– 3,441	150.1
– Cash and cash equivalents	– 104,415	– 152,847	– 48,432	46.4
+ Receivables sold in the course of factoring and ABS transactions	230,111	463,065	232,954	101.2
– Factoring receivables	– 25,245	– 24,412	833	– 3.3
– Receivables from ABS programmes	– 5,589	– 34,316	– 28,727	514.0
<b>Net debt</b>	<b>1,569,078</b>	<b>1,451,176</b>	<b>– 117,902</b>	<b>– 7.5</b>

Trade payables increased by EUR 343.6m on the prior year to EUR 3,613.2m primarily due to acquisitions.

For further information on PHOENIX's financial liabilities, please refer to the sections on "Financial liabilities" and "Other notes" in the notes to the consolidated financial statements.

See Financial liabilities (p. 89) and other notes (p. 91)

## EMPLOYEES

### DEVELOPMENT OF EMPLOYEES

Number as of 31/01/

### EMPLOYEES BY COUNTRY

as of 31/01/2019

At the end of fiscal year 2018/19, PHOENIX employed 37,140 employees across a total of 27 countries in Europe. The headcount increased by 9.4% on the prior year primarily due to the first-time consolidation of the entities in Romania and Serbia. The number of full-time equivalents increased by 7.2% to 29,632.

**Number of employees increased significantly specifically as a result of acquisitions**

### Employee survey strengthens dialogue with employees

PHOENIX's corporate culture is characterised by values that are enshrined in the company's mission statement, group-wide management guidelines, and a trust-based dialogue between managers and employees.

The opinions, satisfaction and motivation of its employees are particularly important to PHOENIX. In order to foster dialogue with our employees further, we conducted a group-wide employee survey in autumn 2018, giving some 34,000 employees across Europe the opportunity to rate PHOENIX as an employer. This was the second group-wide survey following the one in 2015, thus allowing us to draw important conclusions about the changes implemented.

64% of employees gave feedback about their own work situation in 2018. The response rate was even slightly higher than that in 2015. The results show that the majority of employees still feel that PHOENIX is the right employer for them. Many of them are extremely satisfied with their work environment. Most of the staff would recommend PHOENIX to others or would reapply for a job at the company. Leadership was also rated as excellent. Most countries saw an improvement here compared to 2015 or were able to keep the rating at the same level.

In countries or business segments with a consistent follow-up process to the 2015 employee survey, employees felt a significantly stronger affiliation to the company. On the whole, the company sees room for improvement to increase commitment throughout PHOENIX. To achieve this, we will focus even more strongly on an optimised follow-up process in future: The results of the current survey will be used specifically to create further measures for improvement. In 2019, the management of PHOENIX will receive a progress report every quarter and regularly discuss the status of development with the country managers.

PHOENIX also receives important feedback on the potential for improvement from the annual talks with employees. We also want to improve digital employee communication in the future and gradually introduce an employee app in various countries.

### Expertise through training

It is especially important to PHOENIX to acknowledge the potential of its employees and to systematically foster their capabilities, which is why the company uses an efficient training system that allows employees to build up their expertise and gain valuable input for their personal development.

All employees participate in targeted on-boarding programmes and training according to their field of work. The mandatory elements include training on the subjects of Good Distribution Practice (GDP), Code of Conduct, the Anti-Corruption Policy, the Competition Compliance Policy, and the General Data Protection Regulation (GDPR). In addition to classroom training sessions, we mainly use e-learning systems to provide employees efficient training on a variety of different subjects. Furthermore, PHOENIX is stepping up its exchange of best practices at a European level in the course of excellence programmes.

—  
21  
—  
Results of the current employee survey are being used specifically for further improvements

### Broad roll-out of Talent Management

PHOENIX endeavours to fill management positions from within its own ranks if possible. To this end, there is cross-border succession planning for top positions that offer international career opportunities for management and strengthen their connection with the company. For this purpose, PHOENIX has developed a Talent Management system that defines the key positions within the company, identifies high performers, and opens up ideal opportunities for progression. In fiscal year 2018/19, there were more than 250 managers in the talent management system in total.

Since the end of 2017, PHOENIX has systematically come up with new international development programmes to foster talented managers:

- the Top Management Education Programme (TMP) for all of PHOENIX's top management,
- the Senior Management Education Programme (SMP) for selected managers at the second-highest management level, and
- the Middle Management Education Programme (MMP) for (future) managers in middle management (team leaders).

Participants of the SMP and MMP are nominated using various criteria in their countries and selected centrally by means of an online assessment, among others. This approach ensures a high level of performance and learning.

In Germany, we also offer

- the Junior Development Programme (JDP) for younger employees with management potential, as well as
- the Management Development Programme (MDP) for experienced employees.

### Appealing opportunities for trainees and students

PHOENIX offers young and motivated people a wide range of opportunities to join, such as internships, apprenticeships, and combined courses of study. We are involved in various different careers and degree information events, as well as training fairs, in order to make interested applicants aware of the appealing opportunities offered by PHOENIX.

As of 1 October 2018, PHOENIX employed 118 trainees and 14 combined degree students at its German sub-group. The company provides a career start with an apprenticeship as a merchant in wholesale and foreign trade, a warehouse logistics specialist, an IT specialist, or as a Bachelor's student of commerce or information systems. PHOENIX promotes group-wide communications that transcend national boundaries by means of time spent abroad during combined degrees. In fiscal year 2018/19, students were able to gain experience in Italy and Hungary.

Training ensures the availability of qualified employees in the future

# RISK AND OPPORTUNITY REPORT

- Risk management system allows action to be taken swiftly
- Risks and opportunities identified early on
- Quality and stability of operating processes serve as a foundation
- PHOENIX exploits opportunities

## RISK MANAGEMENT

The risk management system within PHOENIX consists of comprehensive planning, approval and reporting structures and an early warning system. The internal audit department examines this system regularly for adequacy, operability and efficiency. The Executive Board regularly receives reports on the audit findings of the internal audit.

## RISKS

PHOENIX is subject to market risks. As a rule, the pharmaceutical market is less affected by cyclical swings than other industries, but the loss of purchasing power and cost-saving measures in government spending on healthcare can have a negative impact on the market and our business activities.

PHOENIX is subject  
to a variety of risks

The earnings situation in the pharmaceutical wholesale business is also influenced by the terms and conditions granted to customers and by suppliers. These depend in particular on the level of competition in the individual countries, which is why they are continually monitored on both the sales and purchasing side.

In the operating business, the quality and stability of the operating processes are decisive. In many areas, there are contingency plans for maintaining operations even in the event of unforeseen interruptions. The standardisation of the IT systems also helps ensure the stability of the operating processes.

The planned Brexit could give rise to economic and political uncertainties. It still cannot be predicted whether and to what extent this will have an impact on the wholesale and retail pharmaceutical businesses. There could also be unexpected fluctuations in the exchange rate, which could cause the translation risk to increase.

### Credit risk and accounts receivable management

The credit risk at PHOENIX, measured as total receivables, is comparatively low. Regardless of this, payment terms in the public healthcare system tend to vary from one country to another, with longer payment terms customary in southern and eastern Europe. In our experience, the risk is also distributed over a large number of customer relationships. In the course of liberalisation of the pharmacy markets in Europe, however, pharmacy chains and new sales channels are increasingly emerging, creating a large number of major customers with a higher level of receivables outstanding.

A group-wide guideline for accounts receivable management aims to systematically monitor receivables risks.

### Acquisition projects

PHOENIX's strategy is to acquire pharmacies and wholesale companies in order to expand its own market position. As a result, the group is exposed to legal, fiscal, financial, and operational risks from acquisitions. The central mergers & acquisitions department therefore analyses and reviews acquisition projects before they are approved by the Executive Board. It may, however, happen that developments anticipated at the date of acquisition do not eventuate. This can, in turn, lead to an impairment loss being recognised on goodwill in the course of impairment testing.

### Legal risks

PHOENIX is active in 27 countries in Europe. In light of its strong market position, there is a risk that competition authorities will occasionally rule in a way that is unfavourable for us. Trade with pharmaceutical products requires compliance with certain legal requirements in the different countries. Infringements of these requirements may result in corresponding penalties by the authorities.

### Financial risks

In a financing context, PHOENIX is exposed to various risks.

In the course of the refinancing measures concluded in June 2012, certain financial covenants were agreed, the breach of which presents a risk to financing. The development of liabilities and covenants is monitored regularly as a result. In fiscal year 2018/19, we complied with the agreed covenants comfortably.

Derivatives are used to hedge against interest rate and currency risks. Their use is monitored intensively on a timely basis. Derivative financial instruments are only used for hedging purposes; counterparty risks are minimised by the careful selection of trading partners.

The agreements underlying our corporate bonds contain restrictions and obligations for PHOENIX, as the issuer, as are customary in the market. Failure to comply with these restrictions and obligations could result in the amount of the bond plus the interest accrued falling due.

As regards the currency translation risk, the exchange rates of the pound sterling and the Norwegian krone are of relevance for PHOENIX. Currency transaction risks are relevant in some eastern European countries where deliveries by the pharmaceutical manufacturers are sometimes invoiced in euro and sometimes in US dollar. For the group, however, these are not material. Fluctuations on the financial markets may also lead to shortfalls in the pension funds and the inherent risk of an unplanned increase in personnel expenses.

### Tax risks

The companies of PHOENIX based in Germany are subject to tax field audits. Foreign subsidiaries are subject to the audit requirements of their local tax authorities. Tax backpayments cannot be ruled out as a result of tax audits performed at German and foreign companies.

Please also refer to the comments in the notes to the consolidated financial statements.

See consolidated financial statements (p. 36)

## OPPORTUNITIES

Demographic trends and medical progress are key growth drivers for the pharmaceutical markets. The broad geographic diversification of PHOENIX reduces the impact of changes in healthcare policy in individual markets and provides a strong basis for successfully developing our business activities further. Thanks to its broad geographical coverage, for instance, PHOENIX can offer the pharmaceutical industry services across Europe.

### Strong market position in wholesale

PHOENIX holds a leading market position in pharmaceutical wholesale in almost all countries in which it operates. It is the market leader in a large number of countries and has a particularly strong position in Northern and Eastern Europe and in Germany. No competitor has comparable geographic coverage or market position in these regions.

In addition, PHOENIX can fall back on long-established partnerships with pharmacy customers. Many customers take part in the company's cooperation programmes. In some countries, PHOENIX also offers franchise systems for independent pharmacies.

### Well-positioned in a stable market

The integration of the wholesale and retail pharmaceutical business offers opportunities to further improve the supply of pharmaceuticals and save on costs.

In the logistics business unit, PHOENIX continuously implements best practices across Europe. Process optimisation measures that are successful in one country serve as a starting point for improvement measures in other countries and can help to reduce costs there.

The sound financing structure has established the financial prerequisites for the future growth of PHOENIX, both organically and through the appropriate acquisitions.

## MANAGEMENT'S OVERALL ASSESSMENT OF THE RISKS AND OPPORTUNITIES

Generally speaking, PHOENIX enjoys a strong position in a stable market. This allows it to successfully take advantage of any opportunities that present themselves in order to build on its strong market position in the future. The risks and opportunities in the pharmaceutical retail business are not subject to any major changes over time. There are currently no discernible risks to jeopardise the company's ability to continue as a going concern.

See graphics p. 4 and p. 5 (Fundamental information about the group)

## FORECAST

- Slight economic and market growth expected in the eurozone and Germany
- Revenue to record stronger growth than the European pharmaceutical markets
- PHOENIX is well-positioned for the future

### FUTURE ECONOMIC ENVIRONMENT

We anticipate a stable economic environment in 2019, with GDP in Germany and the eurozone expected to grow by around 1%.

We expect the pharmaceutical markets in Europe to record market growth of around 2.0% overall in 2019. In Germany, our largest market, we anticipate market growth of approximately 2.2%.

### FUTURE DEVELOPMENT OF PHOENIX

For fiscal year 2019/20, PHOENIX expects to further expand its market position in Europe through organic growth and acquisitions and thereby increase revenue slightly above the level of growth on the European pharmaceutical markets. We expect revenue growth in nearly all markets in which we are present.

For fiscal year 2019/20, we expect EBITDA to be up slightly on the level for 2018/19 (adjusted for effects from the first-time application of IFRS 16).

The outlook for the 2019/20 fiscal year is positive

We expect a slight increase in the equity ratio (adjusted for effects from the first-time application of IFRS 16).

### MANAGEMENT'S ASSESSMENT OF THE GROUP'S FUTURE POSITION

Management is convinced that PHOENIX is well-positioned to achieve positive business development in the medium and long term. In addition to organic and acquisition-related growth, increasing efficiency will also be an important contributing factor.

Mannheim, 8 April 2019

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

for fiscal year 2018/19

## GENERAL

### The company

The group of PHOENIX Pharmahandel GmbH & Co KG, Mannheim ("PHOENIX"), is a European pharmaceuticals trading group. PHOENIX has business activities in 27 European countries. In several countries, PHOENIX also operates pharmacy chains of its own. The company is entered in the commercial register in Mannheim under HRA 3551 and has its registered office at Pfingstweidstrasse 10 – 12 in 68199 Mannheim, Germany. The consolidated financial statements of PHOENIX Pharmahandel GmbH & Co KG are included in the consolidated financial statements of PHOENIX Pharma SE, Mannheim.

### Basis of presentation

The consolidated financial statements of PHOENIX have been prepared in accordance with the version of the International Financial Reporting Standards (IFRSs) as issued by the International Accounting Standards Board (IASB), London, that is valid on the reporting date and endorsed by the European Union, the interpretations of the IFRS Interpretations Committee (IFRS IC), and the additional requirements of German commercial law pursuant to Sec. 315e HGB ["Handelsgesetzbuch": German Commercial Code].

The consolidated financial statements are presented in euros (EUR), and all values are rounded to the nearest thousand (EUR k), except when otherwise indicated.

The consolidated financial statements have been prepared on a historical cost basis. This excludes equity instruments of other entities, certain debt instruments of other entities, derivative financial instruments, and contingent purchase price payments, which are measured at fair value. The income statement was prepared using the nature of expense method. The statement of financial position has been classified into current and non-current items in line with IAS 1. For the sake of clarity, certain items in the statement of financial position and the income statement are summarised. Details of these items are presented in the notes to the financial statements.

The consolidated financial statements of PHOENIX for the fiscal year as of 31 January 2019 were authorised for issue by the management of PHOENIX Pharmahandel GmbH & Co KG on 8 April 2019.

### Application of new accounting standards

In fiscal year 2018/19, PHOENIX applied the following standards and interpretations that are mandatory for fiscal year 2018/19 for the first time:

#### IFRS 9 Financial Instruments

IFRS 9 is the new standard for the recognition of financial instruments, which PHOENIX has applied retrospectively as of 1 February 2018 for the first time without adjusting the prior-year figures. The transition effects as of the date of first-time application were cumulatively recorded in equity and are presented accordingly in the consolidated statement of changes in equity. The comparative period is presented in accordance with the previous regulations under IAS 39. Comparability of the two periods is therefore limited.

IFRS 9 introduces new provisions for the classification and measurement of financial assets and replaces the current rules on the impairment of financial assets. The classification and measurement of financial obligations remains largely unchanged.

Under IFRS 9, the classification and measurement of financial assets is determined by the entity's business model and the cash flow characteristics of the respective financial asset. PHOENIX measures equity instruments held as of 1 February 2018 uniformly at fair value through profit or loss. Investments in limited partnerships, previously disclosed in the "available for sale" category with recognition of changes in fair values in other comprehensive income in the consolidated statement of comprehensive income, are now classified as debt instruments, with changes in their fair values recognised through profit or loss. As of the transition date, EUR 12,511k resulted from a reclassification within the reserves of "IAS 39 Available-for-sale assets" to "Retained earnings".

IFRS 9 introduces a new impairment model for financial assets, which are measured at amortised cost. This model provides for reporting of expected credit losses as of the date of initial recognition. This results in an additional need to recognise impairment as of 1 February 2018. Furthermore, under ABS/factoring agreements, trade receivables are to be measured at fair value. As of the transition date, a total amount of EUR – 26,006k (after taxes) was recognised through other comprehensive income.

In addition, this results in more extensive notes.

The following tables present the significant effects of the new accounting provisions of IFRS 9 for the classification and measurement of financial instruments and impairment of financial assets.

The original measurement categories and carrying amounts of the financial assets and liabilities pursuant to IAS 39 as well as the new measurement categories and carrying amounts of these financial assets and liabilities pursuant to IFRS 9 are presented in the table below:

Measurement categories financial instruments				
	Category pursuant to IAS 39	Category pursuant to IFRS 9	Carrying amount in accordance with IAS 39 as of 31 Jan 2018	Carrying amount in accordance with IFRS 9 as of 1 Feb 2018
<b>Financial assets</b>				
Equity and debt instruments	Available-for-sale financial assets	At fair value through OCI	38,070	0
Equity and debt instruments	Available-for-sale financial assets at acquisition cost	At fair value through profit or loss	2,717	40,787
Trade receivables	Loans and receivables	At amortised cost	2,693,278	2,210,407
Trade receivables	Loans and receivables	At fair value through profit or loss	0	456,747

Measurement categories financial instruments				
	Category pursuant to IAS 39	Category pursuant to IFRS 9	Carrying amount in accordance with IAS 39 as of 31 Jan 2018	Carrying amount in accordance with IFRS 9 as of 1 Feb 2018
Loans to and receivables from associates or related parties	Loans and receivables	At amortised cost	9,012	9,012
Other loans	Loans and receivables	At amortised cost	80,026	75,994
Derivative financial assets without hedge accounting	Held-for-trading financial assets	At fair value through profit or loss	1,648	1,648
Other financial assets	Loans and receivables	At amortised cost	125,059	124,981
Cash and cash equivalents	Loans and receivables	At amortised cost	104,415	104,415
<b>Financial liabilities</b>				
Liabilities to banks	Other financial liabilities	At amortised cost	328,886	328,886
Bonds	Other financial liabilities	At amortised cost	496,319	496,319
Loans	Other financial liabilities	At amortised cost	116,337	116,337
Trade payables	Other financial liabilities	At amortised cost	3,269,574	3,269,574
Liabilities to associates and related parties	Other financial liabilities	At amortised cost	49,411	49,411
Liabilities and provisions for customer rebates and bonuses	Other financial liabilities	At amortised cost	33,119	33,119
ABS/factoring liabilities	Other financial liabilities	At amortised cost	414,954	414,954
Other financial liabilities	Other financial liabilities	At amortised cost	18,279	18,279
Other financial liabilities	Other financial liabilities	At fair value through profit or loss	8,073	8,073
Derivative financial liabilities without hedge accounting	Financial liabilities held for trading	At fair value through profit or loss	2,521	2,521

The table below shows a reconciliation of the carrying amounts of the financial assets in accordance with IAS 39 as of 31 January 2018 to the carrying amounts in accordance with IFRS 9 as of 1 February 2018:

Reconciliation of carrying amounts (IAS 39 to IFRS 9)				
	Carrying amount in accordance with IAS 39 as of 31 Jan 2018	Reclassification effects	Measurement effects	Carrying amount in accordance with IFRS 9 as of 1 Feb 2018
<b>Financial instruments measured at amortised cost</b>				
Trade receivables	2,693,278	-456,747	-26,124	2,210,407
Loans to and receivables from associates or related parties	9,012	0	0	9,012
Other loans	80,026	0	-4,032	75,994
Other financial assets	125,059	0	-78	124,981
Cash and cash equivalents	104,415	0	0	104,415
<b>Total financial instruments measured at amortised cost</b>	<b>3,011,790</b>	<b>-456,747</b>	<b>-30,234</b>	<b>2,530,346</b>
<b>Available-for-sale financial assets</b>				
Equity and debt instruments measured at fair value	38,070	-38,070	0	0
Equity and debt instruments measured at amortised cost	2,717	-2,717	0	0
<b>Total available-for-sale financial assets</b>	<b>40,787</b>	<b>-40,787</b>	<b>0</b>	<b>0</b>
<b>Financial assets at fair value through profit or loss</b>				
Equity and debt instruments measured at fair value	0	38,070	0	38,070
Equity and debt instruments measured at amortised cost	0	2,717	0	2,717
Trade receivables	0	456,747	0	456,747
Derivative financial assets without hedge accounting	1,648	0	0	1,648
<b>Total financial assets measured at fair value through profit or loss</b>	<b>1,648</b>	<b>497,534</b>	<b>0</b>	<b>499,182</b>

The effects from the increase in loss allowances from the first-time application of the new impairment model are presented in the table below:

Reconciliation of loss allowances (IAS 39 to IFRS 9)				
	Trade receivables	Other loans	Other financial assets	Total
<b>Measurement categories</b>				
pursuant to IAS 39	Loans and receivables	Loans and receivables	Loans and receivables	
pursuant to IFRS 9	At amortised cost	At amortised cost	At amortised cost	
<b>Loss allowances</b>				
Pursuant to IAS 39 (31 Jan 2018)	49,973	15,205	0	65,178
Additions due to changing measurement category	26,124	4,032	78	30,234
Disposals due to changing measurement category	0	0	0	0
Pursuant to IFRS 9 (1 Feb 2018)	76,097	19,237	78	95,412
Difference in retained earnings	-26,124	-4,032	-78	-30,234

#### IFRS 15 Revenue from Contracts with Customers

IFRS 15 replaces the provisions of IAS 11, IAS 18, IFRIC 13, IFRIC 15, IFRIC 18 and SIC-31 and sets an extensive framework for determining whether, in what amount, and at what point in time revenue is recognised. IFRS 15 provides for a uniform, five-level revenue recognition model that is generally applicable to all contracts with customers. PHOENIX mainly generates revenue from the sale of simple-structured pharmaceuticals products, for which the control is transferred to the customer at a point in time. There were no significant transition effects as of 1 February 2018 for PHOENIX, because the current procedure for revenue recognition is basically already in line with the new provisions.

#### Other standards and interpretations

The amendments to IAS 40 relate to clarifications in respect of the requirements to reclassify to the category "Investment Property". This did not have any effect on the assets, liabilities, financial position and financial performance of PHOENIX.

The Annual Improvements to IFRS 2014 – 2016 Cycle contains clarifications of individual standards. This did not have any effect on the assets, liabilities, financial position and financial performance of PHOENIX.

IFRIC 22 regulates the translation of foreign currency transactions in the event of prepayments made or received. This did not have any effect on the assets, liabilities, financial position and financial performance of PHOENIX.

### Standards, interpretations and amendments issued, but not yet adopted

The IASB and IFRS IC have adopted the standards and interpretations listed below, whose application is not yet mandatory for fiscal year 2018/19 or have not yet been endorsed by the European Commission in some cases as of the reporting date. There are no plans for early adoption.

Standard/interpretation		Effective as of the fiscal year	Endorsed by the EU
Amendments to IFRS 3	Definition of a Business	2020/21	No
Amendments to IFRS 9	Prepayment Features with Negative Compensation	2019/20	Yes
IFRS 16	Leases	2019/20	Yes
IFRS 17	Insurance Contracts	2021/22	No
Amendments to IAS 1 and IAS 8	Definition of Material	2020/21	No
Amendments to IAS 19	Plan Curtailment or Settlement	2019/20	Yes
Amendments to IAS 28	Long-term Interests in Associates and Joint Ventures	2019/20	Yes
Annual IFRS Improvements	2015 – 2017 cycle	2019/20	Yes
IFRIC 23	Uncertainty over Income Tax Treatments	2019/20	Yes
Amendments to the Conceptual Framework	Conceptual Framework	2020/21	No

According to the amendments to IFRS 3, in addition to economic resources, a business will also in future require a substantial process that, together with the resources, has the ability to create output. Output will only refer to the delivery of goods and rendering of services in future as well as the generation of capital and other income. Cost reductions on their own are no longer considered sufficient to differentiate between the acquisition of a business from the acquisition of a group of assets. From a current perspective, we do not expect any significant effects on the assets, liabilities, financial position and financial performance of PHOENIX.

The amendments to IFRS 9 intend to make it possible to also measure financial assets with negative compensation that are repaid ahead of schedule at amortised cost or at fair value through other comprehensive income. We do not expect any significant effects on the assets, liabilities, financial position and financial performance of PHOENIX.

The amendments resulting from IFRS 16 mainly concern the lessee. Under IFRS 16, which will replace IAS 17, IFRIC 4, SIC-15 and SIC-27 in future, all leases, as well as the associated contractual rights and obligations, must generally be recognised in the statement of financial position of the lessee. As of the date of first application, we expect total assets to increase significantly on account of the increase in lease liabilities and fixed assets in the high triple-digit million euro range. The increase in lease liabilities results in a corresponding increase in net debt. In future, write-downs and interest expenses will be recognised in the income statement instead of lease expenses. This is expected to lead to a significant improvement in EBITDA in the low triple-digit million euro range and an increase in cash flow from operating activities in the statement of cash flows in the low triple-digit million euro range.

The application of IFRS 17 is not expected to have any effects on the assets, liabilities, financial position and financial performance of PHOENIX.

The amendments to IAS 1 and IAS 8 relate to the standardisation of the definition of “materiality” in all IFRSs and in the framework. Furthermore, the definition of “obscuring” information was newly added. The amendments to IAS 1 and IAS 8 are not expected to have any effects on the assets, liabilities, financial position and financial performance of PHOENIX.

The amendments to IAS 19 stipulate how to calculate the current service cost and the net interest expenses of a plan curtailment or settlement (“intervention”) for the period between the intervention and the end of the reporting period. From a current perspective, we do not expect any significant effects on the assets, liabilities, financial position and financial performance of PHOENIX.

The amendments to IAS 28 clarify that the impairment requirements pursuant to IFRS 9 apply to long-term interests in associates and joint ventures accounted for using the equity method. From a current perspective, we do not expect any significant effects on the assets, liabilities, financial position and financial performance of PHOENIX.

The Annual Improvements to the IFRS 2015 – 2017 Cycle, contains clarifications of individual standards. There will be no significant impact on the assets, liabilities, financial position or financial performance of PHOENIX.

IFRIC 23 specifies the recognition and measurement policies for uncertain tax items. We do not expect this to have any significant effects on the assets, liabilities, financial position or financial performance of PHOENIX.

The amendments to the conceptual framework are not expected to affect the consolidated financial statements of PHOENIX.

### **Basis of consolidation**

The consolidated financial statements comprise the financial statements of PHOENIX and its subsidiaries for the fiscal year as of 31 January 2019.

Subsidiaries are fully consolidated from the acquisition date, i.e. the date on which the group obtains control, and continue to be consolidated until the date that such control by the parent ceases.

PHOENIX obtains control over another company when it can exercise power over the investee, is exposed, or has rights, to variable returns on its involvement with the investee and has the ability to affect the amount of those returns through its power over the investee.

The financial statements of most of the subsidiaries are prepared for the same reporting period as the parent company, using consistent accounting policies. The entities in Norway, Luxembourg, Bulgaria, Serbia, Bosnia, North Macedonia, Kosovo, Montenegro, Albania, France, and Romania as well as the entities in Hungary, the Netherlands, Germany, and Switzerland have 31 December as their reporting date. In general, there is no material impact on the financial statements; this notwithstanding, any material impact is taken into account.

All intragroup balances, income and expenses and unrealised gains and losses resulting from intragroup transactions are eliminated in full.

Non-controlling interests represent the portion of profit or loss and net assets that is not attributable to the group. The portion of profit or loss attributable to non-controlling interests was consequently disclosed separately in the income statement from the portion attributable to the owners of the parent company. They are reported directly in equity in the statement of financial position, separately from the equity attributable to the owners of the parent company. Acquisitions of non-controlling interests and changes in the interests attributable to the parent company that do not lead to a loss of control are accounted for as equity transactions.

The entire basis of consolidation comprises 426 (31 January 2018: 430) fully consolidated German and foreign entities, of which one (31 January 2018: one) is a structured entity. 21 entities (31 January 2018: 25) were accounted for using the equity method. The complete list of shareholdings is an integral component of the notes to the consolidated financial statements and will be published in the electronic version of the German Federal Gazette.

136 (31 January 2018: 137) entities are fully consolidated, although PHOENIX holds less than 50% of the voting rights. Contractual arrangements mean that PHOENIX is able to direct the relevant activities of these entities.

As of the reporting date, there were relationships in place with a total of four (31 January 2018: five) structured entities, of which one (31 January 2018: one) was fully consolidated. The structured entities are asset-backed securities (ABS) entities. The ABS entities are mainly used to refinance the group. The non-consolidated structured entities are immaterial for the assets, liabilities, financial position and financial performance of PHOENIX.

The table below presents changes in interests without loss of control in the current fiscal year.

in %	31 Jan. 2018	31 Jan. 2019
Phoenix International Beteiligungs GmbH	97.67	100.00
Phoenix Aktiengesellschaft	60.00	52.60
Thure Apotheken VOF	74.00	87.00

Megváltó 98 Gyógyszertár Bt.	49.90	99.90
PHOENIX Zdravotnícke zásobovanie a.s.	96.04	96.06

PHOENIX Pharmahandel GmbH & Co KG, Mannheim, exercised the exemption provision of Sec. 264b HGB.

The following entities have exercised the exemption provision pursuant to Sec. 264 (3) HGB:

- ADG Apotheken-Dienstleistungsgesellschaft mbH
- JDM Innovation GmbH
- PHOENIX Pharma-Einkauf GmbH
- Virion GmbH
- PHOENIX International Beteiligungs GmbH
- Health Logistics GmbH
- Param GmbH
- Nordic Beteiligungs GmbH
- PHOENIX Noweropa Beteiligungs GmbH
- transmed Transport GmbH

### **Business combinations and goodwill**

Business combinations are accounted for using the acquisition method. The cost of the business combination corresponds to the fair value of the assets given, the equity instruments issued and the liabilities incurred and assumed as of the date of exchange. It also includes the fair value of any recognised asset or liability resulting from a contingent consideration arrangement. Acquisition-related costs are expensed as incurred. On initial recognition of an acquisition, all identifiable assets, liabilities, and contingent liabilities are measured at acquisition-date fair value. For each business combination, the group decides on a case-by-case basis whether the non-controlling interests in the acquiree are measured at fair value or the proportionate share in the recognised amounts of the acquiree's net identifiable assets.

Any difference between (i) the aggregate of cost of the business combination, any non-controlling interest in the acquiree, and the acquisition-date fair value of any previously held equity interests; and (ii) the fair value of the net identifiable assets acquired is recognised under goodwill. Following initial recognition, goodwill is measured at cost less cumulative loss allowances and not amortised. Goodwill is subjected to an impairment test at least once annually at the reporting date or whenever there is any indication of impairment.

If the cost of acquisition is less than the fair value of the net assets of the subsidiary acquired as of the acquisition date, the difference is recognised directly in the income statement.

### **Currency translation**

The consolidated financial statements are presented in euros, which is also the parent company's functional currency. This is the currency of the primary economic environment in which PHOENIX operates.

Transactions in foreign currency are translated to the functional currency at the rate prevailing on the transaction date. Monetary items denominated in foreign currencies are translated at the rate of exchange prevailing at the reporting date. All exchange differences are taken to the income statement, provided they are not allocable to monetary items denominated in foreign currency which are part of a net investment in a foreign operation, in which case the exchange differences are recorded in other comprehensive income.

The assets and liabilities of group entities whose functional currency is not the euro are translated to euro at the rate of exchange prevailing as of the reporting date and their income statements are translated at average rates. The exchange differences arising on the translation are recorded in other comprehensive income until the subsidiaries are disposed of.

Changes in exchange rates on the prior year are as follows:

Country	Currency	Closing rate		Average rate	
		31 Jan. 2018	31 Jan. 2019	FY 2017/18	FY 2018/19
Albania	ALL	133,4400	124,6400	133,8875	126,6467
Bulgaria	BGN	1,9558	1,9558	1,9558	1,9558
Bosnia and Herzegovina	BAM	1,9558	1,9558	1,9558	1,9558
Czech Republic	CZK	25,2720	25,7600	26,1904	25,6641
Croatia	HRK	7,4325	7,4238	7,4556	7,4175
Denmark	DKK	7,4419	7,4657	7,4395	7,4549
United Kingdom	GBP	0,8791	0,8758	0,8786	0,8849
Hungary	HUF	310,6500	315,8800	309,2176	319,7983

Switzerland	CHF	1,1631	1,1409	1,1204	1,1513

## Summary of significant accounting policies

### Intangible assets

Purchased intangible assets are measured on initial recognition at acquisition cost plus any incidental costs of acquisition and less any trade discounts or rebates. Internally generated intangible assets are stated at cost.

Following initial recognition, intangible assets are carried at historical cost less any accumulated amortisation and any accumulated impairment losses. For the purposes of amortisation, the useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortised on a straight-line basis over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired.

Intangible assets with indefinite useful lives are not amortised, but are tested for impairment at least annually either individually or at the cash-generating unit level. These intangible assets are not subject to amortisation. The useful life of an intangible asset with an indefinite life is reviewed annually to determine whether indefinite life assessment continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis.

Pharmacy licences with indefinite useful lives grant unlimited territorial protection under public law for the sale of drugs and other pharmaceuticals products and the authorisation to operate a pharmacy within a city.

The useful lives of the main types of intangible assets are as follows:

- Pharmacy licences      indefinite
- Software                      3 to 5 years
- Trademarks                  indefinite or 18 years

### **Property, plant and equipment**

Property, plant and equipment are carried at historical cost less accumulated depreciation and any accumulated impairment losses. Maintenance and repair costs are expensed as incurred. Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalised. A qualifying asset is an asset that necessarily takes a substantial period of time to get ready for its intended use or sale.

With the exception of land, property, plant and equipment are depreciated over the expected useful life. Items of property, plant and equipment are depreciated pro rata in the year of acquisition. The residual values, useful lives and the depreciation method are reviewed at least at the end of each reporting period.

The useful lives of the main types of tangible assets are as follows:

- Buildings                                      25 to 50 years
- Technical equipment and machinery      5 to 14 years
- Other equipment, fixtures and fittings    3 to 13 years

### **Investment property**

Investment property is property held to earn rentals and/or for capital appreciation. It is recognised at cost less depreciation and any impairment losses using the cost method as for property, plant and equipment.

### **Investments in associates**

An associate is an entity over which the group can exercise significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee, where there is neither control nor joint control over the entity in decision-making processes. Investments in associates are reported using the equity method and initially measured at cost. Goodwill relating to associates is included in the carrying amount of the investment and is not amortised or tested for impairment separately.

The income statement reflects the group's share of the associates' profit or loss for the period. Where there has been a change recognised directly in the equity of the associates, the group recognises its share of any changes and discloses this, when applicable, in the statement of changes in equity. Any unrealised gains and losses resulting from transactions between the group and the associates are eliminated to the extent of the interest in the associates.

Where necessary, adjustments are made to bring the accounting policies in line with those of the group.

After application of the equity method, the group determines whether it is necessary to recognise an additional impairment loss on the group's investment in its associates. The group determines at each reporting date whether there is any objective evidence that the investment in the associate is impaired. If this is the case, the group calculates the amount of impairment as the difference between the recoverable amount of the investment in the associate and its carrying amount and recognises the difference in the income statement.

#### **Non-current assets held for sale**

Non-current assets or disposal groups are classified as held for sale if their carrying amounts will be recovered principally through a very likely sale transaction. They are measured at the lower of their carrying amount or fair value less cost to sell.

#### **Impairment of non-financial assets**

Property, plant and equipment and intangible assets with finite useful lives are reviewed at each reporting date to determine whether there is any indication that they may be impaired. If this is the case, the recoverable amount of the asset is determined. The recoverable amount is the higher of fair value less costs to sell and value in use. If the carrying amount exceeds the recoverable amount, an impairment loss is recognised in profit or loss for the difference between the carrying amount and the recoverable amount. For the purpose of impairment testing, assets are allocated to the smallest identifiable group of assets that generates cash inflows. If the cash flows are not separately identifiable for an asset, the impairment test is performed on the basis of the cash-generating unit to which the asset belongs.

If the reasons for an impairment loss no longer apply, it is reversed up to the new recoverable amount. The upper limit for the reversal of impairment losses is the amortised cost that would have been determined if no impairment losses had been charged.

For impairment testing, goodwill is assigned to the cash-generating units. Impairment testing of cash-generating units is performed at least once a year or whenever there is any indication that the carrying amount of a cash-generating unit may exceed the recoverable amount. Where the recoverable amount of the cash-generating unit falls short of the carrying amount of its net assets, an impairment loss is recognised in accordance with the requirements of IAS 36. Impairment losses recognised on goodwill may not be reversed in subsequent periods.

The recoverable amount of the cash-generating units (or groups of cash-generating units) is determined on the basis of value in use. Free cash flows are discounted using the weighted average cost of capital. The free cash flows are based on financial budgets approved by management covering a detailed planning period of five years.

Impairment losses are recognised on intangible assets with indefinite useful lives according to the same principles. If the reasons for an impairment loss no longer apply, it is reversed up to the new recoverable amount.

### **Financial assets and financial liabilities (financial instruments)**

#### **Measurement and recognition of financial assets and financial liabilities**

**Financial instruments** are recognised when PHOENIX becomes a party to the contractual provisions of the instrument. Regular way purchases are recognised on the settlement date.

Upon initial recognition, **financial assets** and **financial liabilities** are measured at fair value. For financial instruments classified as “at fair value through profit or loss”, transaction costs that are directly attributable to the acquisition or issue of financial assets or financial liabilities are also taken into account. Trade receivables that do not have a significant financing component are initially recognised at transaction price. The fair value of financial instruments that are actively traded in organised financial markets is determined by reference to quoted market prices at the close of business on the reporting date. For financial instruments where there is no active market, fair value is determined using valuation techniques. Such techniques may include using recent arm’s length market transactions; reference to the current fair value of another instrument that is substantially the same; discounted cash flow analysis or other valuation models.

#### **Categories of financial assets pursuant to IFRS 9**

Upon initial recognition, **financial assets** are classified either as “at amortised cost” or “at fair value through profit or loss”. The subsequent measurement and recognition of financial assets depends on their classification.

The only **financial assets classified as at amortised cost** are those that are held within a business model whose objective is to hold financial assets in order to collect contractual cash flows, and the contractual terms of the financial assets give rise to cash flows that are solely payments of principal and interest on the principal amount outstanding.

All other financial assets that do not satisfy these criteria are classified as **at fair value through profit or loss**.

**Trade receivables** are generally classified as “at amortised cost”. Impairments for expected credit losses are taken into account. Trade receivables that are part of an ABS or factoring agreement are classified as “at fair value through profit or loss” because they are held within a business model whose objective is to hold assets to collect contractual cash flows.

**Loans granted** are generally classified as “at amortised cost”. Impairments for expected credit losses are taken into account.

#### Categories of financial assets pursuant to IAS 39

The **loans and receivables** category comprises non-derivative financial instruments with fixed or determinable payments that are not listed on an active market. After initial recognition, they are measured at amortised cost less any impairments using the effective interest method.

Available-for-sale financial assets comprise non-derivative financial assets that do not fall under any other category. In general, they are measured at fair value. The resulting gains and losses are recognised through other comprehensive income. Upon disposal of or recognition of a loss allowance for these financial assets, the gains and losses recognised in accumulated other income are reclassified to the income statement through profit or loss. They are measured on the basis of corresponding market values or by using appropriate measurement policies. Investments in equity instruments for which there is no active market and whose fair value cannot be reliably measured are measured at cost.

At initial recognition, **financial liabilities** are classified as “at amortised cost” or as “at fair value through profit or loss”.

**Financial liabilities** and **trade payables** are carried at amortised cost using the effective interest method, if appropriate. Gains and losses are recognised when the liabilities are derecognised.

PHOENIX has not designated any non-derivative financial assets or financial liabilities as at fair value through profit or loss.

**Financial guarantee** contracts issued by the group are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts are recognised initially as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequently, the liability is measured at the higher of the best estimate of the expenditure required to settle the present obligation at the reporting date and the amount recognised less cumulative amortisation.

The group has not issued any financial guarantees for consideration.

#### Impairment of financial assets

Impairments for **expected credit losses** are reported for financial assets classified as “at amortised cost” and for lease receivables.

Regardless of their term, for trade receivables and lease receivables, impairments are recorded at an amount equal to lifetime expected credit losses (lifetime ECL). Loss rates determined using historical default rates and the expected future developments – based on credit default swaps – are applied for this purpose, which take into account the business model, the respective customer group and the economic environment of the geographical region.

Impairments in the amount equal to the ECL are taken into account for other financial assets classified as "at amortised cost" if compared to the initial recognition, the default risk of the financial asset has increased significantly. If the financial asset has a low default risk or if its default risk has not increased significantly since the initial recognition, impairments are recognised at the amount equal to the 12-month expected credit loss (12-month ECL).

Financial assets that are significantly past due, which can also be more than 90 days due to the customer structure, or those financial assets whose debtor is subject to insolvency proceedings, as well as when legal proceedings have been initiated, are tested for individual impairment (default event).

To assess whether the **default risk** for a financial instrument has **increased significantly** since its initial recognition, the risk of a default occurring on the financial instrument as at the reporting date is compared with the risk of a default occurring on the financial instrument as of the date of initial recognition. This process considers qualitative and quantitative information which is available without undue cost or effort. A significant increase in the default risk occurs if the contractually agreed payments are more than 30 days past due, the internal rating of the customer deteriorates, or the economic situation or the payment behaviour of the customer changes adversely. Furthermore, it is assumed that restructured receivables present an increased credit risk. For financial instruments with a low credit risk, it is assumed that the default risk has not increased since the initial recognition. The credit risk of financial instruments is considered low if they are allocated to a low internal risk category and the borrower has the capacity to meet its contractual cash flow obligations in the near term and adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the borrower to fulfil its contractual cash flow obligations.

Financial assets are written-off in their entirety or a portion thereof if there is no reasonable expectation of recovering them. This is particularly the case when the borrower is in the process of liquidation or when insolvency proceedings have been concluded.

In accordance with IAS 39, only impairments for incurred losses were reported (incurred loss model). For financial assets belonging to the "available-for-sale financial assets" category, loss allowances were recognised only for significant or permanent impairment. Identifiable risks were taken into account by means of appropriate loss allowances for trade receivables and loans granted that were classified as "loans and receivables".

#### Derecognition of financial instruments

A financial asset is derecognised if the contractual rights to receive cash flows from this financial asset have expired. Derecognition also applies if the rights to receive cash flows from the asset are transferred to third parties or an obligation to pay the received cash flows is assumed in full without material delay to a third party under a 'pass-through' arrangement; and either substantially all the risks and rewards of ownership of the asset have been transferred, or substantially all the risks and rewards of ownership of the asset have been neither transferred nor retained, but control of the asset has been transferred.

A financial liability is derecognised when the obligation under the liability is discharged, cancelled, or expires.

PHOENIX sells significant volumes of receivables through securitisation programmes or factoring transactions. When the receivables sold do not meet IFRS 9 (prior year: IAS 39) derecognition requirements, the receivables are recognised in the consolidated financial statements even though they have been legally sold. A corresponding financial liability is recorded in the consolidated statement of financial position. Gains and losses related to the sale of such assets are not recognised until the assets are removed from the consolidated statement of financial position. Within certain securitisation programmes, PHOENIX has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset. These transactions are recognised to the extent of the group's continuing involvement.

#### Derivative financial instruments and hedge accounting

The group uses derivative financial instruments to hedge its exposure to interest rate and foreign currency risks. Derivatives are initially recognised at fair value on the date on which a derivative contract is entered into and subsequently remeasured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Any gains or losses arising from changes in the fair value of derivative financial instruments during the reporting period are taken directly to profit or loss.

In the case of derivatives with quoted market prices, fair value is the positive or negative fair value, if necessary after any reduction for counterparty risk. If no quoted market prices are available, fair value is estimated on the basis of the conditions obtained at the end of the reporting period, such as interest rates or exchange rates, and using recognised valuation techniques, such as discounted cash flow models or option pricing models.

#### Inventories

Inventories are initially recognised at cost based on the first in, first out (FIFO) method. Costs incurred in bringing each product into its present location and condition are included in cost at initial recognition.

At each reporting date, inventories are measured at the lower of cost or net realisable value. Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

#### Cash and cash equivalents

The item "Cash and cash equivalents" comprises cash on hand, bank balances, and short-term deposits that have a maximum term of three months from the date of acquisition. Cash and cash equivalents are measured at amortised cost.

**Equity**

The components of equity are recognised in accordance with IAS 32 (rev. 2008). Financial instruments have to be classified on initial recognition as a financial liability, financial asset or an equity instrument in accordance with the substance of the contractual arrangements and the definitions of IAS 32 (2008). The capital contributions of the unlimited and limited partners of PHOENIX Pharmahandel Gesellschaft mit beschränkter Haftung & Co KG (puttable instruments) are classified as equity as all criteria of IAS 32 (2008) were satisfied. The criteria for puttable instruments that should be classified as an equity instrument are:

- a) The instrument entitles the holder to a pro rata share of the entity's net assets in the event of the entity's liquidation.
- b) The instrument is in the class of instruments that is subordinate to all other classes of instruments.
- c) All financial instruments in the class of instruments that is subordinate to all other classes of instruments have identical features.
- d) Apart from the contractual obligation for the issuer to repurchase or redeem the instrument for cash or another financial asset, the instrument does not include any contractual obligation to deliver cash or another financial asset to another entity, or to exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavourable to the entity, and it is not a contract that will or may be settled in the entity's own equity instruments as set out in the definitions for financial liabilities in accordance with IAS 32.
- e) The total expected cash flows attributable to the instrument over the life of the instrument are based substantially on the profit or loss, the change in the recognised net assets or the change in the fair value of the recognised and unrecognised net assets of the entity over the life of the instrument (excluding any effects of the instruments).

**Treasury shares**

Any treasury shares that the group acquires are recognised at cost and deducted from equity. No gain or loss is recognised in the income statement on the purchase, sale or cancellation of the group's own equity instruments. Any difference between the carrying amount and the consideration is recognised in retained earnings.

**Pensions and other post-employment benefits**

Obligations for defined benefit plans are determined using the projected unit credit method in accordance with IAS 19, taking into account not only the pension obligations and vested pension rights known at the reporting date, but also expected future wage and salary increases. The interest rate used to determine the net obligation was set on the basis of high-quality fixed-interest securities with a term to maturity corresponding to the duration of the pension plans in the relevant country. Plan assets are recognised at fair value. All actuarial gains and losses are recognised in other comprehensive income. Past service cost is expensed immediately.

**Provisions**

A provision is recognised when there is a present (legal or constructive) obligation towards a third party on the basis of a past event, and the obligation can be reliably estimated. Provisions are stated at the amount needed to settle the obligation and are not netted against positive contributions to earnings. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

**Current and deferred taxes**

The tax expense of the period comprises current and deferred taxes. Taxes are recognised in the income statement, unless they relate to items recognised directly in equity or in other comprehensive income in which case the taxes are also recognised in equity or other comprehensive income.

**Current income tax charge**

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities.

**Deferred income tax**

Deferred taxes are recognised for all temporary differences between the tax base of the assets/liabilities and their carrying amounts pursuant to the IFRS financial statements (liability method). Deferred tax assets are also recognised on unused tax losses and tax credits. Deferred taxes are measured using the tax rates and tax provisions enacted or substantively enacted by the reporting date and that are expected to apply to the period when the asset is realised or the liability is settled.

Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and unused tax losses can be utilised.

Deferred tax liabilities for taxable temporary differences associated with investments in subsidiaries and associates are recognised, unless the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

## Leases

Leases are classified either as finance leases or as operating leases. Leases, where the group as lessee retains substantially all the risks and rewards of ownership of the asset, are classified as finance leases. In this case, the group recognises the leased asset at the lower of fair value and the present value of the minimum lease payments and depreciates the leased asset over the estimated useful life of the asset or the shorter contract term. A corresponding liability is recognised at the same time, which is repaid and reduced in subsequent periods using the effective interest method. All other leases where the group is the lessee are classified as operating leases. In this case, the lease payments are recognised as an expense on a straight-line basis.

Leases where the group as lessor transfers substantially all the risks and rewards of ownership of the asset to the lessee are classified as finance leases. In this case, the group recognised a receivable from finance lease arrangements for the amount of the net investment in the lease. Lease payments are thus split into interest payments and repayments of the lease receivable so as to achieve a constant rate of interest on the receivable. All other leases where the group is the lessor are classified as operating leases. Initial direct costs incurred in negotiating and concluding an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as the lease income.

## Revenue recognition

PHOENIX primarily generates revenue from simply structured sales of pharmaceuticals and related goods and – to a lesser extent – from the rendering of services.

The typical performance obligations of PHOENIX are presented below:

Performance obligation	Point in time when the performance obligation is normally satisfied	Significant payment terms	Determining the transaction price
<b>Wholesale</b>			
Sale of pharmaceuticals (partly as agent)	Transfer of control, typically upon delivery (at a point in time)	Payable within a certain period of no more than 180 days	List price less discount and rebate
<b>Retail</b>			
Sale of pharmaceuticals	Transfer of control, typically upon delivery (at a point in time)	Payable immediately (for payment in the pharmacy), or within 60 days (for reimbursement by health insurance companies)	Pharmacy sales price
<b>Pharma services</b>			
Rendering of services (e.g. logistics services, patient services, business intelligence)	Upon rendering the service (over time)		In accordance with contractual arrangement

In general, revenue for the rendering of services is recognised on a monthly basis.

Retrospective discounts are often agreed in wholesale. The revenue from these sales is recognised in the amount of the price fixed in the agreement, less the discount granted. The estimate of the discount obligation is based on experience (expected value method). The discount obligation is offset against trade receivables. Revenue is recognised only to the extent that it is highly probable that a significant cancellation of revenue will not be necessary, provided the associated uncertainty does not exist any longer.

In cases where PHOENIX acts as principal, i.e. has the exposure to the significant risks and rewards associated with the sale of goods, (gross) revenue from the sale of pharmaceuticals and related goods is recorded. Indicators for this case are contract situations in which the group has the primary responsibility to meet the obligations towards the customer carries the significant risks and rewards attributable to inventory and has latitude over product pricing.

In cases where the group acts as an agent, revenue is recorded in the amount of the commission. This is the case where, on aggregate, the above indicators are not satisfied. This situation occurs when PHOENIX does not bear substantially all the risks and rewards and holds ownership of merchandise.

#### **Significant accounting judgements, estimates and assumptions**

The preparation of the consolidated financial statements requires management to make judgements, estimates and assumptions. Estimates are made primarily for the measurement of assets, liabilities and contingent liabilities acquired through business combinations, impairment tests according to IAS 36, measurement of provisions for pensions, other provisions as well as income tax, particularly related to deferred tax assets on the carryforward of unused tax losses. However, uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of the asset or liability affected in future periods.

The key assumptions and estimates concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next fiscal year are discussed below.

#### **Impairment of non-financial assets**

Impairment testing of the group regarding goodwill is largely based on the calculations of the value in use. Free cash flows are discounted using an appropriate discount rate (weighted average cost of capital). The cash flows are derived from the budget for the next five years and do not include restructuring activities that the group is not yet committed to or significant future investments that will enhance the asset's performance of the CGU being tested.

The recoverable amount is most sensitive to the perpetual capital expenditures and the discount rates used for the discounted cash flow model, as well as the expected future cash inflows, and the growth rate used for extrapolation purposes.

The impairment test for intangible assets with indefinite useful lives is based on fair value less costs to sell calculations that use a relief from royalty approach or an EBITDA multiple.

Further details on impairment are disclosed in Notes 10 and 26.

#### Deferred tax assets

Deferred tax assets are recognised for all unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

Further details on deferred taxes are disclosed in Note 8.

#### Pension benefits

The cost of defined benefit plans and the present value of the pension obligation are determined using actuarial valuations. Actuarial valuation involves making various assumptions. The actuarial valuation involves making assumptions about interest rates, future salary increases, mortality rates and future pension increases. All assumptions are reviewed at each reporting date. In determining the appropriate discount rate, management considers the interest rates of high-quality fixed-interest securities with a duration corresponding to the pension plans in the related country. The mortality rate is based on publicly available mortality tables for the specific country.

Future salary increases and pension increases are based on expected future inflation rates for the respective countries.

Further details about the assumptions used are given in Note 19.

#### Fair value of financial instruments

Where the fair value of financial assets and financial liabilities recorded in the statement of financial position cannot be derived from active markets, they are determined using valuation techniques including the discounted cash flow model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. The judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

Further details on financial instruments can be found in the note "Additional information on financial instruments".

### Loss allowance for expected credit losses on trade receivables and lease receivables

For the measurement of expected credit losses on trade receivables and lease receivables, PHOENIX applies the simplified approach provided by IFRS 9. According to this standard, at initial recognition as well as at every subsequent reporting date, a risk provision is recognised in the amount equal to the lifetime ECL. The risk provision is determined separately for individual customer groups. Initially, the average default rates per customer group are determined using the historical default rates of the last three years in the respective countries. The historical default rates are then adjusted for developments expected in future. PHOENIX applies the CDS rate of the respective country as a relevant factor, which it uses to calculate a minimum default rate. At the same time, the CDS rate serves as the basis for determining the rate of loss for receivables from public institutions.

Assessing the link between the historical default rates, forecast future developments and expected credit losses constitutes a significant estimate. The amount of the expected credit losses depends on changes in circumstances and the forecast future developments.

More information on expected credit losses on trade receivables and lease receivables is available in the note "Additional information on financial instruments".

### Revenue recognition

Under IFRS 15, the gross versus net sales presentation of distribution agreements with pharmaceuticals suppliers depends on whether the group acts as a principal or an agent. This judgement requires among others an estimation of the risks and rewards related to inventories and trade receivables incurred by PHOENIX in the context of these distribution agreements.

Further details on revenue are disclosed in Note 1.

### Business combinations

The business acquisitions carried out in fiscal year 2018/19 and fiscal year 2017/18 are explained below. Business combinations are initially accounted for using the acquisition method pursuant to IFRS 3 "Business Combinations".

In fiscal year 2018/19, the cumulative profit for the period of the group's acquirees came to EUR 3,923k and revenue to EUR 361,588k. Had the acquisition date coincided with the beginning of the reporting period for all business combinations, the cumulative revenue for the period would have come to EUR 689,087k. Had the acquisition date coincided with the beginning of the reporting period for all business combinations, the cumulative profit for the period would have come to EUR 7,477k.

The table below shows a summary of their fair values:

#### Fair value recognised as of the acquisition date

EUR k	Wholesale and retail Romania	Other	Total
Cash and cash equivalents	123,572	51,224	174,796
Equity instruments	0	0	0
Acquisition-date fair value of previously held equity interests	0	115	115
<b>Total cost</b>	<b>123,572</b>	<b>51,339</b>	<b>174,911</b>
Intangible assets	35,239	42	35,281
Other non-current assets	44,319	2,579	46,898
Inventories	79,816	6,835	86,651
Trade receivables	104,185	5,032	109,217
Cash and cash equivalents	9,509	2,387	11,896
Other current assets	3,253	2,982	6,235
Non-current liabilities	12,330	5,584	17,914
Current liabilities	227,308	16,607	243,915
<b>Net assets</b>	<b>36,683</b>	<b>-2,334</b>	<b>34,349</b>
Non-controlling interests	1,465	0	1,465
<b>Net assets acquired</b>	<b>35,218</b>	<b>-2,334</b>	<b>32,884</b>
<b>Bargain purchase</b>	<b>0</b>	<b>0</b>	<b>0</b>
<b>Goodwill</b>	<b>88,354</b>	<b>53,673</b>	<b>142,027</b>

#### Wholesale and retail Romania

On 31 July 2018, the group acquired 88.8% of the voting shares in Farmexim S.A. and 100.0% of the voting shares in Help Net Farma S.A. They are a pharmaceutical wholesaler and a pharmacy chain. PHOENIX is expected to be able to further expand its market position in Europe through its market entry in Romania.

Goodwill from this business acquisition is allocated to the Romania cash-generating unit.

The fair value of current receivables contains trade receivables with a fair value of EUR 104,185k. The gross amount of the trade receivables past due amounts to EUR 121,930k, of which EUR 15,732k is expected to be uncollectible.

Non-controlling interests were recognised at the proportionate identifiable net assets in the acquirees.

The purchase price allocation takes into account all the information about facts and circumstances as of the acquisition date that was available until the preparation of these financial statements. If further facts or circumstances become known within the 12-month measurement period in accordance with IFRS 3, the purchase price allocation is adjusted accordingly.

#### **Other business acquisitions**

In fiscal year 2018/19, the group acquired a pharmacy chain as well as additional pharmacies in business combinations that are individually immaterial.

The goodwill arising on those acquisitions, which mainly results from expected synergies or location advantages, was allocated to the cash-generating units Netherlands (EUR 16,570k), Serbia (EUR 15,879k), Norway (EUR 12,029k), Slovakia (EUR 4,513k), Czech Republic (EUR 2,271k), Austria (EUR 1,477k), Baltics (EUR 704k) and Hungary (EUR 230k) and is recorded in the local functional currencies (EUR, RSD, NOK, CZK and HUF).

Non-controlling interests were recognised at the proportionate identifiable net assets in the acquirees.

EUR 6,117k of the recognised goodwill from business combinations is expected to be tax deductible.

The purchase price allocation takes into account all the information about facts and circumstances as of the acquisition date that was available until the preparation of these financial statements. If further facts or circumstances become known within the 12-month measurement period in accordance with IFRS 3, the purchase price allocation is adjusted accordingly.

#### **Business acquisitions in fiscal year 2017/18**

In fiscal year 2017/18, the cumulative profit for the period of the group's acquirees came to EUR – 794k and revenue to EUR 22,770k. Had the acquisition date coincided with the beginning of the reporting period for all business combinations, the cumulative revenue for the period would have come to EUR 46,582k. Had the acquisition date coincided with the beginning of the reporting period for all business combinations, the cumulative profit for the period would have come to EUR 1,187k.

The table below shows a summary of their fair values:

#### Fair value recognised as of the acquisition date

EUR k	Other
Cash and cash equivalents	40,529
Equity instruments	0
Acquisition-date fair value of previously held equity interests	159
<b>Total cost</b>	<b>40,688</b>
Intangible assets	1
Other non-current assets	2,368
Inventories	2,889
Trade receivables	1,553
Cash and cash equivalents	1,245
Other current assets	773
Non-current liabilities	1,859
Current liabilities	5,820
<b>Net assets</b>	<b>1,150</b>
Non-controlling interests	71
<b>Net assets acquired</b>	<b>1,079</b>
<b>Bargain purchase</b>	<b>0</b>
<b>Goodwill</b>	<b>39,609</b>

In fiscal year 2017/18, the group acquired a research and consulting entity as well as additional pharmacies in business combinations that are individually immaterial.

The goodwill arising on those business acquisitions, which mainly result from expected synergies or location advantages, was allocated to the cash-generating units Netherlands (EUR 22,304k), Norway (EUR 5,303k), Finland (EUR 5,221k), Slovakia (EUR 2,690k), Baltics (EUR 1,452k), Switzerland (EUR 1,726k) and Czech Republic (EUR 913k) and is recorded in the local functional currencies (EUR, NOK, CHF and CZK).

Non-controlling interests were recognised at the proportionate identifiable net assets in the acquirees.

EUR 13,375k of the recognised goodwill from business combinations is expected to be tax deductible.

Two companies were initially accounted for on the basis of a provisional purchase price allocation in fiscal year 2017/18 that was finalised in fiscal year 2018/19. This caused the goodwill of the Netherlands cash-generating unit to increase by EUR 1,342k, rights and licences to increase by EUR 177k, land to decrease by EUR 7k, other assets to increase by EUR 200k, financial liabilities to increase by EUR 1,625k as well as other liabilities to increase by EUR 87k. The prior-year figures have been restated accordingly.

### Divestitures

There was an overall gain from deconsolidation of EUR 830k (prior year: EUR 3,259k) resulting from the sale of business operations, which was recognised in other operating income.

## NOTES TO THE INCOME STATEMENT

### 1 Revenue

The table below shows a breakdown of revenue based on the type of goods and services:

FY 2018/19	Trade revenue	Revenue from commissions	Distribution fees and consignment warehouse fees	Other logistics services	Other services	Other revenue	Total
EUR k							
Gross revenue	26,705,912	102,229	73,733	34,205	126,403	131,897	27,174,379
Sales deductions	-1,362,172	0	-14	0	0	-14	-1,362,200
<b>Revenue</b>	<b>25,343,740</b>	<b>102,229</b>	<b>73,719</b>	<b>34,205</b>	<b>126,403</b>	<b>131,883</b>	<b>25,812,179</b>
thereof satisfaction of performance obligation at a point in time	25,343,740	94,180	65,323	31,674	126,403	98,275	25,759,595
thereof satisfaction of performance obligation over time	0	8,049	8,396	2,531	0	33,608	52,584

In the prior year, the group mainly generated revenue from the sale of pharmaceutical and related products (EUR 24,467,975k). The smaller portion of revenue is attributable to commissions, distribution fees and consignment warehouse fees, other logistics services, other services and other revenue (for example, the sale of pharmacy IT systems).

In the reporting year, revenue of EUR 11,029k was reported, which was included in the contract liability balance at the beginning of the period.

## 2 Other operating income

EUR k	FY 2017/18	FY 2018/19
Net gain on disposal of fixed assets	3,951	1,402
Income from services	20,323	22,360
Rental income	10,986	11,117
Marketing and other services	56,447	63,106
Allocation of freight costs	13,799	8,605
Other	52,098	51,530
<b>Other operating income</b>	<b>157,604</b>	<b>158,120</b>

The item "Other" contains a number of individual items, such as energy cost mark-ups and own work capitalised. It also contains income from the deconsolidation of business operations EUR 830k (prior year: EUR 3,259k).

## 3 Personnel expenses

EUR k	FY 2017/18	FY 2018/19
Wages and salaries	1,009,221	1,074,385
Social security contributions, retirement benefits and similar expenses	230,516	241,237
Other personnel expenses	102,654	105,157
	<b>1,342,391</b>	<b>1,420,779</b>

The average headcount measured in full-time equivalents (FTEs) increased by 1,994 to a total of 29,632. Other personnel expenses mainly include training expenses and costs for temporary personnel.

The average headcount (FTEs) breaks down as follows by region:

	FY 2017/18	FY 2018/19
Western Europe	14,953	14,832
Eastern Europe	6,925	8,799
Northern Europe	5,760	6,001
	<b>27,638</b>	<b>29,632</b>

The line item "Wages and salaries" includes an amount of EUR 20,587k (prior year: EUR 17,042k) for severance payments and similar costs.

#### 4 Other operating expenses

EUR k	FY 2017/18	FY 2018/19
Transport costs	306,138	313,467
Lease and rental costs	160,218	173,576
Exchange rate gains/losses	- 51	408
Net impairment of receivables	6,305	204
Other building and equipment costs	64,401	68,407
Marketing and advertising expenses	63,281	66,866
Communication and IT expenses	74,998	80,701
Legal and consulting fees	61,215	69,839
Repair and maintenance costs	35,415	35,742
Net loss on the disposal of fixed assets	1,789	8,870
Other taxes	14,394	15,541
Office supplies	10,159	9,777
Insurance costs	8,781	9,248
Expenses related to ABS and factoring programmes	2,309	1,318
Other	64,028	65,148
<b>Other operating expenses</b>	<b>873,380</b>	<b>919,112</b>

The development of bad debt allowances is presented in Note 16.

In fiscal year 2018/19, the auditor of the financial statements, Ernst & Young GmbH Wirtschaftsprüfungsgesellschaft, received audit fees of EUR 827k (prior year: EUR 699k), of which EUR 62k (prior year: EUR 94k) were for the prior year, EUR 10k (prior year: EUR 0k) were other attestation fees, EUR 8k (prior year: EUR 247k) were tax advisory fees, and EUR 12k (prior year: EUR 21k) were for other services.

The item "Other" contains various individual items, such as consignment fees, contributions to professional associations and administrative expenses.

#### 5 Result from associates and other investments

The result from associates mainly includes the profit from several associates, chiefly non-controlling interests in pharmacies.

## 6 Amortisation and impairment of intangible assets and depreciation of property, plant and equipment

EUR k	FY 2017/18	FY 2018/19
Amortisation of intangible assets and depreciation of property, plant and equipment	131,771	138,025
Impairment of pharmacy licenses	778	10,816
Reversal of impairment loss	0	-2,679
Impairment of goodwill	14,000	279,513
Other impairments	389	798
<b>Impairment of intangible assets</b>	<b>15,167</b>	<b>288,448</b>

## 7 Financial result

EUR k	FY 2017/18	FY 2018/19
Interest income	14,808	17,845
Interest expenses	-50,098	-48,902
Other financial result	-15,283	-12,660
<b>Financial result</b>	<b>-50,573</b>	<b>-43,717</b>

Interest income includes interest income from customers of EUR 9,608k (prior year: EUR 10,127k).

The other financial result contains exchange rate gains of EUR 29,955k (prior year: EUR 45,646k), as well as exchange rate losses of EUR 36,866k (prior year: EUR 42,663k), income of EUR 49,142k (prior year: EUR 65,341k) and expenses of EUR 43,419k (prior year: EUR 68,644k) from changes in market values of derivatives, changes in market values of financial assets of EUR 5,967k (prior year: EUR 0k), impairment of financial assets of EUR 14,253k (prior year: EUR 3,206k), as well as other financial income of EUR 836k (prior year: EUR 1,128k), and other financial expenses of EUR 4,022k (prior year: EUR 861k). Furthermore, the prior year also included earnings from the disposal of financial assets classified as available for sale of EUR 199k and losses from the redemption of bonds of EUR 12,223k.

The financial result includes interest income and interest expenses of EUR -26,474k on financial assets and liabilities that are not classified as "at fair value through profit or loss" (prior year: EUR -32,003k).

## 8 Income tax

The major components of tax expense are summarised in the table below:

EUR k	FY 2017/18	FY 2018/19
Current taxes	65,346	64,332
Deferred taxes	11,915	15,853
	<b>77,261</b>	<b>80,185</b>

The current income tax includes income for prior periods of EUR 8,919k (prior year: EUR 16,764k) and expenses of EUR 2,009k (prior year: EUR 2,928k).

In fiscal year 2018/19, net tax income (after non-controlling interests) of EUR 9,799k was recognised outside profit or loss (prior year: EUR 5,789k). This amount results from actuarial gains and losses from pension obligations (EUR 3,744k; prior year: EUR – 877k), net investments in foreign operations (EUR 1,880k; prior year: EUR 7,579k) as well as changes in the fair value of financial assets classified as available for sale (EUR 4,175k; prior year: EUR – 913k), which are recognised in other comprehensive income.

The deferred taxes at year-end were calculated using the tax rates applicable to the respective entities in their respective countries at the time of realisation.

In the current fiscal year, the interest rate in Norway decreased by 1.0 percentage points as well as in Hungary by 1.0 percentage points and increased in Latvia by 5.0 percentage points.

A reconciliation of the expected income tax expense to the actual income tax expense using the average tax rate of the group is presented in the table below:

	FY 2017/18		FY 2018/19	
	EUR k	in %	EUR k	in %
<b>Profit before tax</b>	<b>257,456</b>	<b>100.0</b>	<b>-17,421</b>	<b>100.0</b>
<b>Expected income tax expense</b>	<b>61,017</b>	<b>23.7</b>	<b>-3,624</b>	<b>20.8</b>
Impact of changes to tax rates on deferred taxes	480	0.2	-2,983	17.1
Tax effect of non-deductible expenses and tax-exempt income	13,585	5.3	3,372	-19.4
Effect of taxes relating to prior years recognised in the fiscal year	-14,949	-5.8	-7,335	42.1
Effect of differing national tax rates	-749	-0.3	12,113	-69.5
Effect of loss allowances/adjustments to carrying amounts	18,702	7.3	27,108	-155.6
Effects of impairments on goodwill	2,100	0.8	50,924	-292.3
Other effects	-2,925	-1.2	610	-3.5
<b>Income taxes</b>	<b>77,261</b>	<b>30.0</b>	<b>80,185</b>	<b>-460.3</b>

Other effects include deferred tax income of EUR 704k (prior year: EUR 1,548k) relating to temporary differences associated with investments in subsidiaries.

The deferred tax assets and the deferred tax liabilities are summarised in the table below:

EUR k	31 January 2018		31 January 2019	
	Deferred tax assets	Deferred tax liabilities	Deferred tax assets	Deferred tax liabilities
Intangible assets	6,783	82,907	5,838	81,846
Property, plant and equipment	3,863	33,856	5,265	33,722
Financial and other assets	4,620	14,320	9,996	11,711
Inventories	4,319	2,805	6,240	3,137
Assets classified as held for sale	0	0	0	0
Provisions	41,883	1,974	43,858	2,120
Liabilities	8,364	5,495	6,558	5,920
<b>Deferred taxes on temporary differences</b>	<b>69,832</b>	<b>141,357</b>	<b>77,755</b>	<b>138,456</b>
Deferred taxes on unused tax losses	28,222	0	10,052	0
Netting	-19,286	-19,286	-21,996	-21,996
<b>Total deferred taxes</b>	<b>78,768</b>	<b>122,071</b>	<b>65,811</b>	<b>116,460</b>

Deferred tax assets are recognised on unused tax losses at the amount at which the associated tax benefits are likely to be realised through future taxable profit. The group has not recognised deferred tax assets on unused tax losses and future interest benefits of EUR 271,684k (31 January 2018: EUR 222,305k). Deferred taxes includes expenses from a reversal of used tax losses and interest carryforwards of EUR 17,382k (prior year: EUR 2,509k) and income from previously unused tax losses of EUR 847k (prior year: EUR 2,352k). The unused tax losses and interest carryforwards expire as follows:

EUR k	31 Jan. 2017	31 Jan. 2018
Within one year	2,180	37
After one year, but within two years	407	0
After two years, but within three years	1,493	0
After three years, but within four years	649	0
After four years, but within five years	0	0
After five years	0	0
Loss carry forwards and interest carryforwards that do not expire	217,576	271,647
	<b>222,305</b>	<b>271,684</b>

No deferred tax liabilities were recognised on distributable reserves of subsidiaries amounting to EUR 2,947,669k (31 January 2018: EUR 3,584,027k) because these reserves are intended to be indefinitely reinvested in the operations of subsidiaries.

## NOTES TO THE STATEMENT OF FINANCIAL POSITION

<b>Net carrying amount 31 January 2019</b>	<b>361,837</b>	<b>1,460,346</b>	<b>15,622</b>

The item "Rights and licences" mainly contains pharmacy licences with indefinite useful lives in the United Kingdom and Romania totalling EUR 287,345k (31 January 2018: EUR 294,471k). The useful life for such licences has been assessed as indefinite due to the fact that such licenses are granted for an unlimited time period.

**Goodwill**

Goodwill carrying amounts in EUR k Country	Currency	31 Jan. 2018	31 Jan. 2019
Germany	EUR	50,656	51,270

<b>Total</b>		<b>1,601,333</b>	<b>1,460,346</b>

<sup>1)</sup> Prior-year figures were restated due to the finalisation of purchase price allocations.

**Impairment testing of goodwill**

The impairment test involves comparing the carrying amount of a cash-generating unit with its recoverable amount.

The calculations of the recoverable amounts for the cash-generating units are most sensitive to the following assumptions:

- **Future free cash flows**

The main components of these free cash flows are EBITDA and the growth rate after the planning period, the cash flow from the change in working capital and the cash flow from investing activities.

- **Discount rates**

The terminal growth rate of 0.5% (31 January 2018: 0.5%) is used to extrapolate the EBITDA and cash flow of the last planning period.

The perpetual cash flow from investing activities is calculated using historical data. This averages 0.6% of revenue (31 January 2018: 0.6%).

Discount rates reflect the current market assessment of the risks specific to each cash-generating unit. The discount rates are derived on the basis of the capital asset pricing model. The discount rates are generally adjusted to reflect the market assessment of country-specific risks for which future estimates of cash flows have not been adjusted.

The discount rate is determined using a two-phase approach. The phase one discount rate is used to discount the future cash flows in the planning period and the second phase discount rate is used to calculate the terminal value. The difference between the discount rates used in phases one and two corresponds to a growth mark-down and stands at 0.5% (31 January 2018: 0.5%).

The table below shows the phase one pre-tax discount rates (WACC) for material cash-generating units:

in %	31 Jan. 2018	31 Jan. 2019
<b>Discount rate (WACC before tax)</b>		
Germany	8.72	8.89
United Kingdom	8.34	9.39
Netherlands	8.11	8.22
Switzerland	6.23	6.95
Hungary	8.79	9.10
Czech Republic	8.73	8.39
Romania	–	10.92
Baltics	8.86	8.28
Denmark	7.61	7.42
Sweden	8.21	8.23
Norway	8.39	8.16
Other	8.34 – 11.61	8.30 – 11.28

As of 31 January 2019, there was an impairment loss for the cash-generating units United Kingdom and Bosnia/North Macedonia/Serbia:

EUR k	31 Jan. 2018	31 Jan. 2019
<b>Impairment of goodwill</b>		
United Kingdom		237,887
Bosnia/North Macedonia/Serbia	14,000	41,626

For the cash-generating unit United Kingdom, the recoverable amount of EUR 496,371k is below the carrying amount, mainly due to deductions in pharmacy remuneration by legislators as well as uncertainties relating to Brexit. The impairment loss is based on the value in use.

For the cash-generating unit Bosnia/North Macedonia/Serbia, the recoverable amount of EUR 111,844k is below the carrying amount primarily because of the reduced medium-term earnings forecast due to the difficult market environment. The impairment loss is based on the value in use. There is no indication that the fair value less costs to sell would lead to a higher recoverable amount than the value in use.

The impairment loss is allocated to reduce the carrying amount of goodwill allocated to the cash-generating unit. The reduction in the carrying amount is treated as an impairment loss and recognised in the line item "Amortisation of intangible assets and depreciation of property, plant and equipment" in the income statement.

A marginal change in the future cash flows, discount rate or long-term investments of the cash-generating units Slovakia and Romania would lead to the carrying amounts exceeding the value in use.

The value in use of the cash-generating unit Slovakia exceeded its carrying amount by EUR 9,703k. A rise in the discount rate of 0.8 percentage points would use up this excess amount.

The value in use of the cash-generating unit Romania exceeded its carrying amount by EUR 5,475k. A decrease in the future cash flows of 3.3% or an increase in the discount rate by 0.3 percentage points or an increase in long-term investments of 9.0% would use up this excess amount.

#### Impairment testing of intangible assets with indefinite useful lives

The trademarks "Numark" and "PharmaVie" were tested for impairment as of 31 January 2018 and 2019. The fair value of the trademarks is determined based on a relief from royalty approach using the recent business plans as of the testing date and an appropriate royalty rate of between 0.1% and 2.0% (31 January 2018: between 0.1% and 2.0%) (level 3). Costs to sell have been deducted in order to derive the fair value less costs to sell. It was not necessary to recognise any impairment losses on the trademarks as of 31 January 2018 and 2019.

The pharmacy licences of Help Net Farma S.A., Romania, were tested for impairment as of 31 January 2019. The recoverable amount of the licences was based on the fair value (level 2) less costs to sell and was determined using a revenue multiple of 0.2. As of 31 January 2019, no impairment was required on the pharmacy licenses of Help Net Farma S.A.

The pharmacy licences of L Rowland & Co. (Retail) Ltd., United Kingdom, were tested for impairment as of 31 January 2018 and 2019. The recoverable amount of the licenses was based on the fair value (level 3) less costs to sell, which was determined using a market price model. The pre-tax discount rate is 7.8% (31 January 2018: 7.9%). The terminal growth rate used to extrapolate the income of the last planning period is 0.5% (31 January 2018: 0.5%).

The impairment tests resulted in the recognition of an impairment loss and reversals of impairment losses on the licenses in the United Kingdom:

EUR k	31 Jan. 2018	31 Jan. 2019
<b>Impairment of licences</b>		
Pharmacy licences, United Kingdom	778	3,188
<b>Reversal of impairment loss on licences</b>		
Pharmacy licences, United Kingdom	0	2,676

The reversals of impairment loss resulted from the planned disposal of certain pharmacies.

<sup>1)</sup> Prior-year figures were restated due to the finalisation of purchase price allocations.

In the course of producing qualified assets, debt capital interest of EUR 1,202k (prior year: EUR 805k) was capitalised, applying an interest rate of 1.67% (prior year: 1.87%).

Items of property, plant and equipment with a carrying amount of EUR 12,555k (31 January 2018: EUR 5,282k) have been pledged as collateral for liabilities. The collateral mainly relates to charges on land and buildings in Romania and Germany.

There are contractual commitments in place to acquire property, plant and equipment of EUR 2,676k (31 January 2018: EUR 4,697k).

### Finance leases

The assets held under finance lease agreements are as follows:

EUR k	31 Jan. 2018	31 Jan. 2019
Land and land rights and buildings, including buildings on third-party land	5,985	5,416
Plant and machinery	84	0
Other equipment, furniture and fixtures	717	2,564
<b>Carrying amount</b>	<b>6,786</b>	<b>7,980</b>

Assets held under finance lease agreements primarily represent buildings held in France and Italy.

The reconciliation of the future minimum lease payments and their present value is disclosed in the table below:

EUR k	31 Jan. 2018	31 Jan. 2019
Minimum lease payments		
due within one year	6,655	6,581
due in between two and five years	2,656	2,810
due in more than five years	468	93
Interest	-941	-393
<b>Present value of minimum lease payments</b>	<b>8,838</b>	<b>9,091</b>

### Operating leases

PHOENIX holds numerous assets under operating leases. Such agreements primarily relate to real estate, technical equipment and company cars. The future minimum lease payments under non-cancellable operating leases are summarised by due date below:

EUR k	31 Jan. 2018	31 Jan. 2019
Minimum lease payments		
due within one year	126,646	153,538
due in between two and five years	308,865	423,780
due in more than five years	178,740	317,701
<b>Total minimum lease payments</b>	<b>614,251</b>	<b>895,019</b>

The expected income from sublet properties amounts to EUR 917k (prior year: EUR 2,108k). The lease expense from operating leases breaks down as follows:

EUR k	31 Jan. 2018	31 Jan. 2019
Lease expense		
Minimum lease payments	156,237	169,166
Contingent rents	3,147	3,480
Sublease payments received	834	930
<b>Total lease expense</b>	<b>160,218</b>	<b>173,576</b>

#### Leases where the group acts as lessor

PHOENIX acts as lessor in several countries of operation. The lease agreements represent finance and operating leases.

#### Finance leases

The finance lease arrangements in which the group acts as lessor are held by the German subsidiary transmed Transport GmbH. This entity acts as lessor for cash systems.

The reconciliation of the future minimum lease payments and their present value is disclosed in the table below:

EUR k	31 Jan. 2018	31 Jan. 2019
Minimum lease payments		
due within one year	1,266	2,951
due in between two and five years	4,772	11,942
due in more than five years	0	0
Interest	- 501	- 1,243
<b>Present value of minimum lease payments</b>	<b>5,537</b>	<b>13,650</b>

#### Operating leases

The most significant operating lease arrangements in which the group acts as lessor are in the Netherlands and individual entities in Germany. Leases in the Netherlands are mainly for buildings. Leases in Germany are mainly for software and cash systems as well as buildings.

The future minimum lease payments are as follows:

EUR k	31 Jan. 2018	31 Jan. 2019
Minimum lease payments		
due within one year	18,640	22,584
due in between two and five years	26,106	35,745
due in more than five years	4,255	10,913
<b>Total minimum lease payments</b>	<b>49,001</b>	<b>69,242</b>

## 11 Investment property

The fair value of the investment property held as of 31 January 2019 determined by expert appraisers using market data (level 2) for comparable properties came to EUR 10,244k (31 January 2018: EUR 10,601k). Rental income in fiscal year 2018/19 came to EUR 486k (prior year: EUR 479k), while expenses totalled EUR 414k (prior year: EUR 510k).

## 12 Interests in other entities

Significant non-controlling interests are held in the following entities: The complete list of shareholdings is an integral component of the notes to the consolidated financial statements and will be published in the electronic version of the German Federal Gazette.

EUR k	FY 2017/18			FY 2018/19	
	Brocef Group	Comifar Group	PHOENIX Int. Beteiligungs GmbH	Brocef Group	Comifar Group
Current assets	356,482	756,290	949,324	321,711	782,318
Non-current assets	657,826	119,517	3,151,143	678,484	121,205
Current liabilities	277,672	540,392	2,129,275	287,076	565,191

Total comprehensive income	35,439	12,624	66,921	60,490	13,829
Cash inflow/outflow from:					
– operating activities	45,378	22,049	59,982	91,656	10,635
– investing activities	–22,987	–15,519	0	–35,760	–8,659
– financing activities	–22,888	–6,852	–458,221	–55,421	–1,984
Gain/loss attributable to non-controlling interests	17,570	807	5,335	28,765	831
Accumulated non-controlling interests at the end of the reporting period	192,413	34,845	99,170	212,117	33,427
Dividends paid to non-controlling interests	5,928	120	0	7,191	447

The non-controlling interests disclosed in the consolidated financial statements are as follows:

EUR k	31 Jan. 2018	31 Jan. 2019
Brocacef Group	192,413	212,117
Comifar Group	34,845	33,427
PHOENIX Int. Beteiligungs GmbH	99,170	0
Other	15,545	23,206
	<b>341,973</b>	<b>268,750</b>

PHOENIX holds investments in 21 associates (31 January 2018: 25). The aggregate amounts are presented below:

EUR k	FY 2017/18	FY 2018/19
Net carrying amount	14,726	7,220
Group share in gain/loss from continuing operations	2,543	8,650
Group share in total comprehensive income	2,543	8,650

Most associates have diverging fiscal years from PHOENIX, typically the calendar year.

### 13 Other financial assets

The table below presents the composition of non-current other financial assets:

EUR k	31 Jan. 2018	31 Jan. 2019
Trade receivables, non-current	16	309
<b>Other financial assets</b>		
Equity and debt instruments	40,787	51,060
Loans to and receivables from associates	2,086	0
Other loans	47,482	25,951
Other non-current financial assets	4,653	11,039
	<b>95,008</b>	<b>88,050</b>

**14 Inventories**

EUR k	31 Jan. 2018	31 Jan. 2019
Raw materials and supplies	17,030	13,841
Finished goods and merchandise	2,099,805	2,282,140
Prepayments	13,871	5,067
	<b>2,130,706</b>	<b>2,301,048</b>

During the fiscal year, inventories were written down by EUR 11,618k (prior year: EUR 11,206k). Impairment losses of EUR 5,149k (prior year: EUR 6,130k) were reversed during the period mainly due to the unexpected sale of written-down inventories. Inventories with a carrying amount of EUR 181,385k (31 January 2018: EUR 155,575k) are measured at their net realisable value at the reporting date.

Inventories with a carrying amount of EUR 82,903k (31 January 2018: EUR 0k) have been pledged as a guarantee for loan agreements.

**15 Trade receivables and other current financial assets**

EUR k	31 Jan. 2018	31 Jan. 2019
Trade receivables	2,693,262	2,552,315
<b>Other financial assets</b>		
Loans to and receivables from associates or related parties	6,926	1,660
Other loans	32,544	394,335
Derivative financial instruments	1,648	8,289
Other financial assets (current)	125,943	96,777
	<b>167,061</b>	<b>501,061</b>

Trade receivables and other assets with a carrying amount of EUR 121,327k (31 January 2018: EUR 91,648k) have been pledged as a guarantee for loan agreements.

The trade receivables transferred under factoring and ABS transactions as of 31 January 2019 are presented below:

EUR k	31 Jan. 2018	31 Jan. 2019
<b>Transferred but only partly derecognised receivables</b>		
Receivables not derecognised in accordance with IFRS 9 (prior year: IAS 39)		
Volume of receivables	456,747	234,224
Financial liabilities	405,924	204,433
<b>Continuing involvement</b>		
Volume of receivables	177,119	169,164
Continuing involvement	8,232	8,514
Financial liabilities	9,030	9,174
<b>Transferred and fully derecognised receivables</b>		
Volume of receivables	61,224	302,415
Retentions of title	30,834	58,728

The carrying amounts of receivables and liabilities correspond to their fair values.

In the case of the transferred but only partly derecognised receivables, PHOENIX has either fully or partly retained the risk of default as well as the risk of late payment attaching to the transferred receivables. The transferred receivables serve as collateral for the purchase price received for them. The amount received for selling these receivables is recognised as a liability. Cash receipts from these receivables have to be transferred to the factor, thus settling the liability.

Other current financial assets mainly include receivables from bonuses, ABS and factoring programmes and other current receivables.

Loss allowances on trade receivables, other loans and lease receivables have developed as follows:

EUR k	Development of impairment losses pursuant to IFRS 9		
	Lifetime ECL impaired trade receivables	Lifetime ECL simplified approach	Total

Currency and other changes	4,205	234
<b>Loss allowances as of 31 January 2018</b>	<b>49,973</b>	<b>15,205</b>

As of 31 January 2018, the ageing analysis of trade receivables and customer loans that are past due but not impaired was as follows:

EUR k	Total carrying amount	Neither past due nor impaired	Impaired	thereof						
				Past due but not impaired						
				< 30 days	31 – 60 days	61 – 90 days	91 – 150 days	151 – 240 days	241 – 330 days	> 330 days
<b>31 January 2018</b>										
Trade receivables	<b>2,693,278</b>	2,311,261	36,339	213,625	68,975	15,330	15,071	14,073	5,160	13,444
Other loans	<b>80,026</b>	73,131	6,895	0	0	0	0	0	0	0

As of 31 January 2018, there were no indications that the debtors of the receivables shown as “past due but not impaired” would not meet their payment obligations. The majority of trade receivables past due > 330 days related to Serbia, Bosnia, North Macedonia and Italy. In some cases, PHOENIX holds promissory notes, pledged assets of pharmacies, mortgages, land and buildings, inventories, cash and cash equivalents and other personal guarantees as collateral for trade receivables as well as for other loans.

## 16 Other assets

EUR k	31 Jan. 2018 <sup>1)</sup>	31 Jan. 2019
Prepayments	62,594	70,015
Tax claims – VAT and other taxes	32,710	46,036
Sundry other assets	16,998	19,228
<b>Other assets</b>	<b>112,302</b>	<b>135,279</b>

<sup>1)</sup> Prior-year figures were restated due to the finalisation of purchase price allocations.

The item “Other assets” contains a number of individual items, such as prepayments and claims in connection with employee benefits.

## 17 Cash and cash equivalents

EUR k	31 Jan. 2018	31 Jan. 2019
Bank balances	99,672	146,803
Cash on hand	4,729	6,029
Cash equivalents	14	13
	<b>104,415</b>	<b>152,845</b>

The movement in cash and cash equivalents is presented in the accompanying statement of cash flows.

## 18 Equity

### Unlimited and limited partners' capital

In 2010/11, the limited partners increased their capital in the parent company by contribution in cash of EUR 550,000k to EUR 1,050,000k. A partial sum of EUR 44,500k was contributed by the fully consolidated entities and offset against reserves. In fiscal year 2014/15, the limited partners increased their capital in the parent company by contribution in cash of EUR 135,000k to EUR 1,185,000k. A partial sum of EUR 10,935k was contributed by the fully consolidated entities and offset against reserves. In fiscal year 2017/18, the limited partners reduced their capital in the parent company by EUR 185,000k to EUR 1,000,000k. A partial amount of EUR 14,985k relates to fully consolidated entities and was offset against reserves.

In addition, no cash outflows stemming from a redemption or repurchase of these financial instruments are expected for the foreseeable future.

### Treasury shares

Treasury shares offset against equity in the prior year (historical cost: EUR 298,737k) were sold to PHOENIX Pharma SE in fiscal year 2018/19 at a price of EUR 266,530k.

### Reserves

Reserves primarily comprise retained earnings.

In fiscal year 2018/19, the limited partners waived their receivables relating to the payment of interest from additional contributions of EUR 192,175k. The amount was added to the reserves. The unlimited partners' capital is still EUR 0k.

### Accumulated other comprehensive income

Accumulated other comprehensive income includes exchange differences and actuarial gains and losses in connection with pension obligations. In accordance with IAS 39, changes in the fair value of "available-for-sale financial assets" were also included in the prior year.

### Non-controlling interests

The profit for the period attributable to non-controlling interests came to EUR 40,161k (prior year: EUR 30,277k).

### Capital management

The objective of capital management at PHOENIX is to ensure a solid financial profile and to secure business operations. In this connection, the aim is also to further strengthen the equity ratio by retaining profits.

Capital expenditures are determined in the annual budgeting process. The focus is on their impact on the consolidated statement of financial position and the consolidated income statement.

The capital structure is monitored based on the equity ratio and net debt. EBITDA is also an important KPI for corporate management purposes.

		31 Jan. 2018 <sup>1)</sup>	31 Jan. 2019
Equity	in EUR k	2,839,969	3,144,752
Total equity and liabilities	in EUR k	8,335,866	8,693,752
<b>Equity ratio</b>	<b>in %</b>	<b>34.1</b>	<b>36.2</b>

<sup>1)</sup> Prior-year figures were restated due to the finalisation of purchase price allocations.

EUR k	31 Jan. 2018	31 Jan. 2019
+ Financial liabilities (non-current)	655,783	662,282
– Derivative financial instruments (non-current)	– 229	– 187
+ Financial liabilities (current)	820,954	543,324
– Derivative financial instruments (current)	– 2,292	– 5,733
– Cash and cash equivalents	– 104,415	– 152,845
+ Receivables sold in the course of factoring and ABS transactions	230,111	463,065
– Factoring receivables	– 25,245	– 24,412
– Receivables from ABS programmes	– 5,589	– 34,316
<b>Net debt</b>	<b>1,569,078</b>	<b>1,451,178</b>

Under the loan agreements in Germany and Italy, a commitment was undertaken to comply with various financial covenants, all of which were comfortably complied with in the reporting year. These include, for instance, the ratio of net debt to EBITDA or the interest cover. Failure to comply with the financial covenants poses a financing risk to the extent that the lenders could demand immediate repayment of the loans.

The agreements underlying our corporate bonds contain restrictions and obligations for PHOENIX, as the issuer, as are customary in the market. Failure to comply with these restrictions and obligations could result in the amount of the bond plus the interest accrued falling due.

Compliance with the agreed covenants is strictly monitored as part of corporate planning and reported to the lenders on a quarterly basis.

## 19 Provisions for pensions and similar obligations

Depending on the economic, legal and tax framework in each country, the employees of PHOENIX have different old-age pension systems in place which are structured as defined contribution or benefit plans.

Obligations from defined benefit plans are financed by external pension funds and provisions. In accordance with IAS 19, these obligations are calculated using the projected unit credit method. To reduce investment risk, investments in plan assets are made in various asset classes. Furthermore, the investment strategy is designed such that the age structure of the asset is matched with the expected time when the pension is paid out.

The majority of pension obligations relate to the countries Norway, Switzerland and the United Kingdom. These primarily relate to pension plans on a final salary basis, for which the pension payments to beneficiaries are adjusted annually in line with the inflation rate.

The obligations in Norway mainly relate to a pension plan set out especially for the pharmaceuticals segment, which is based on the regulations of public sector pension plans. The pension plan is managed by the Norwegian Public Service Pension Fund. In accordance with the provisions of the pension fund, the plan assets must be sufficient to cover at least two-thirds of future pension payments.

The obligation in Switzerland is largely invested in insurance assets. The pension fund is thus outsourced to an external insurer which ensures the agreed minimum coverage is secured in the event of a shortfall in pension assets.

The pension plans in the United Kingdom are also financed by external pension funds. The trustees decide on the minimum coverage of the obligations in consultation with the company. Measurements are performed regularly to ensure the minimum coverage is secured as well as to determine the amount of the contributions.

The sum of all pension expenses in connection with defined contribution plans amounted to EUR 71,555k (prior year: EUR 64,655k). This amount includes the contributions the group made to statutory pension insurance funds which fall under the definition of defined contribution plans.

The table below shows the financing status of the pension plans and the calculation of the net defined benefit liability:

EUR k	31 Jan. 2018	31 Jan. 2019
<b>Calculation of net defined benefit liability</b>		
Present value of funded obligations	- 607,283	- 649,992
Plan assets at fair value	466,692	495,905
<b>Defined benefit obligations in excess of plan assets</b>	<b>- 140,591</b>	<b>- 154,087</b>
Present value of non-funded obligations	- 94,371	- 95,502
<b>Net defined benefit liability</b>	<b>- 234,962</b>	<b>- 249,589</b>

The defined benefit obligations contain the following amounts included in the consolidated financial statements:

EUR k	Defined benefit obligation		Fair value of plan assets		Net carrying amount from defined benefit plans	
	31 Jan. 2018	31 Jan. 2019	31 Jan. 2018	31 Jan. 2019	31 Jan. 2018	31 Jan. 2019
Norway	468,102	513,194	355,423	389,209	- 112,679	- 123,985
Switzerland	77,848	76,126	63,916	62,434	- 13,932	- 13,692
United Kingdom	60,005	59,446	46,427	43,476	- 13,578	- 15,970
Other	95,699	96,728	926	786	- 94,773	- 95,942
<b>Total</b>	<b>701,654</b>	<b>745,494</b>	<b>466,692</b>	<b>495,905</b>	<b>- 234,962</b>	<b>- 249,589</b>

The net defined benefit liability developed as follows:

EUR k	Present value of the defined benefit obligation	Fair value of plan assets	Total
<b>1 February 2017</b>	<b>693,382</b>	<b>- 441,570</b>	<b>251,812</b>
Service cost	22,108		22,108

<b>31 January 2019</b>	<b>745,494</b>	<b>-495,905</b>	<b>249,589</b>

Net interest expenses are recognised within the financial result.

Plan assets break down as follows:

EUR k	31 Jan. 2018	31 Jan. 2019
<b>Plan assets with an underlying active market</b>		
Cash and cash equivalents	6,337	6,405
Equity instruments	37,466	36,962
Debt instruments	258,655	284,648
Property	41,412	46,992
Investment funds	50,838	48,271
Insurance assets	63,915	62,434
Structured debt instruments	7,140	9,406
Other	929	787
	<b>466,692</b>	<b>495,905</b>

The plan assets do not contain any of PHOENIX's own financial instruments or assets used by the group.

The group expects to contribute EUR 34,100k to its defined benefit plans in fiscal year 2019/20.

The principal assumptions used in determining pension obligations for the group's plans are shown below:

in %	31 Jan. 2018	31 Jan. 2019
<b>Discount rate by currency region</b>		
NOK	2.4	2.6
GBP	2.7	2.7
EUR	1.2 – 1.95	1.05 – 1.9
CHF	0.7	0.9
SEK	2.6	2.5
Future salary increases	1.2 – 4.6	1.2 – 4.5
Future pension increases	1.5 – 3.6	1.75 – 3.5

The mortality tables used for the individual countries are based on publicly available data.

The table below shows the effect of each isolated change in the key actuarial assumptions on the present value:

	Change in actuarial assumption in %	Increase in assumption EUR k	Decrease in assumption EUR k
<b>31 January 2019</b>			
Interest rate	0.5	64,491	-74,484
Future salary increases	0.5	-24,522	21,982
Future pension increases	0.5	-45,886	30,251
Life expectancy	10.0	-6,686	6,202
<b>31 January 2018</b>			
Interest rate	0.5	61,914	-71,721
Future salary increases	0.5	-23,637	21,232
Future pension increases	0.5	-44,719	35,166
Life expectancy	10.0	-6,391	6,096

The average duration of the defined benefit plans was 16 years (prior year: 16) in the reporting year.

In Norway and the Netherlands, PHOENIX has pension plans which are operated together with non-affiliated companies (multi-employer plans). In principle, these are both defined benefit and defined contribution plans. If the required information is available in connection with jointly operated defined benefit plans, these plans are accounted for like any other defined benefit plan; otherwise, they are accounted for as defined contribution plans. In the Netherlands, there are jointly operated defined benefit plans that are accounted for as defined contribution plans, as it is not possible to allocate the pension obligations and plan assets to the participating entities on account of the lack of information available. For these plans, PHOENIX expects contribution payments of EUR 14,550k for fiscal year 2019/20. The coverage ratio of these plans (ratio of plan assets to obligation) is between 99.3% and 101.0% (31 January 2018: between 101.0% and 103.0%). In Norway, there is a jointly operated government plan that qualifies as a defined benefit plan and is also accounted for as such. Furthermore, as of 31 January 2019 PHOENIX does not expect any major burdens to arise from the multi-employer plans; there is no intention to exit one of these plans.

PHOENIX is not aware of any likely significant risks from the multi-employer defined benefit plans accounted for as defined contribution plans.

## 20 Other provisions

EUR k	Restructuring	Personnel	Other	Total
<b>1 February 2018</b>	<b>5,101</b>	<b>14,284</b>	<b>33,671</b>	<b>53,056</b>
Currency translation	-2	11	-75	-66
Changes in the basis of consolidation	0	0	2,439	2,439
Addition	5,298	4,282	3,288	12,868
Utilisation	-5,140	-1,809	-18,352	-25,301
Reversal	-264	-369	-2,734	-3,367
Interest	0	123	0	123
<b>31 January 2019</b>	<b>4,993</b>	<b>16,522</b>	<b>18,237</b>	<b>39,752</b>

The cash outflows for the restructuring provision are expected for the next fiscal year.

Personnel-related provisions mainly contain provisions for long-service awards. The corresponding cash outflow is expected within the next year(s) and depends on the occurrence of the respective events. PHOENIX does not expect reimbursements.

Other provisions include, among other things, litigation provisions of EUR 13,496k (31 January 2018: EUR 14,358k). The outflow of these funds is expected within the coming year(s) depending on the occurrence of the respective events or the end of court proceedings. PHOENIX does not expect reimbursements.

## 21 Financial liabilities

At the reporting date, financial liabilities were split between non-current and current liabilities as follows:

EUR k	31 Jan. 2018	31 Jan. 2019
<b>Financial liabilities (non-current)</b>		
Liabilities to banks	149,635	149,708
Bonds	496,319	497,631
Loans	356	252
Other financial liabilities	9,473	14,691
	<b>655,783</b>	<b>662,282</b>

EUR k	31 Jan. 2018 <sup>1)</sup>	31 Jan. 2019
<b>Financial liabilities (current)</b>		
Liabilities to banks	179,251	137,482
Loans	115,981	116,242
Liabilities to associates and related parties	49,411	541
Liabilities for customer rebates and bonuses	33,119	0
ABS/factoring liabilities	414,954	213,607
Other financial liabilities	29,863	75,452
	<b>822,579</b>	<b>543,324</b>

<sup>1)</sup> Prior-year figures were restated due to the finalisation of purchase price allocations.

In May 2013, PHOENIX issued a corporate bond with a volume of EUR 300m, a term of seven years and an interest coupon of 3.125%.

At the end of July 2014, PHOENIX issued a corporate bond with a volume of EUR 300m, a term of seven years and an interest coupon of 3.625%. In November 2017, PHOENIX redeemed bonds with a nominal value of EUR 100m.

In June 2012, PHOENIX concluded a syndicated loan agreement for EUR 1.35b, of which EUR 1.05b was available after repayments as a revolving credit facility with an original term until June 2017. In April 2014, PHOENIX negotiated improvements to the loan conditions and at the same time extended the term to a new residual term of five years. The revolving credit facility was increased by EUR 200m in December 2015 and a residual term of five years agreed. In November 2016, PHOENIX made use of the option to extend the agreement by one year. In October 2017, PHOENIX made use of the option to extend the agreement by one year.

In October 2016, PHOENIX issued a promissory note with a total volume of EUR 150m. The loan comprises four tranches:

- Tranche 1 has a volume of EUR 22.5m, a fixed term of 5 years and an interest coupon of 0.8%
- Tranche 2 has a volume of EUR 53m, a term of up to 5 years and a variable interest coupon
- Tranche 3 has a volume of EUR 23.5m, a fixed term of 7 years and an interest coupon of 1.2%
- Tranche 4 has a volume of EUR 51m, a term of up to 7 years and a variable interest coupon

## 22 Trade payables

Trade payables are non-interest bearing and are normally settled on usual business terms.

## 23 Other liabilities

EUR k	31 Jan. 2018 <sup>1)</sup>	31 Jan. 2019
VAT and other tax liabilities	105,924	71,895
Personnel liabilities	140,225	154,835
Liabilities relating to social security/similar charges	27,763	32,013
Contract liabilities (IFRS 15)	14,864	16,009
Sundry other liabilities	10,406	15,948
<b>Other liabilities</b>	<b>299,182</b>	<b>290,700</b>

<sup>1)</sup> Prior-year figures were restated due to the finalisation of purchase price allocations.

## 24 Non-current assets held for sale

Non-current assets held for sale of EUR 39,417k (31 January 2018: EUR 5,507k) mainly relate to individual pharmacies that will be sold within the next 12 months in the course of portfolio optimisation and primarily contain pharmacy licenses and real estate (31 January 2018: real estate).

In fiscal year 2018/19, an impairment loss of EUR 8,576k (prior year: EUR 0k) was recognised in order to recognise disposal groups at their fair value. The impairment loss is recognised in the income statement under amortisation, depreciation and impairment. The fair value was determined using expected selling prices (level 3).

## OTHER NOTES

### 25 Contingent liabilities

Contingent liabilities totalling EUR 86,258k (31 January 2018: EUR 76,674k) relate exclusively to financial guarantee contracts.

Guarantees are potential future obligations to third parties, the existence of which depends on the occurrence of at least one uncertain future event outside the control of PHOENIX. The guarantees mainly relate to pharmacy customers in the wholesale business and were primarily issued by subsidiaries of the subgroups in the United Kingdom and Austria. The guarantees include obligations for which the probability of outflow is remote.

### 26 Additional information on financial instruments

The items in the statement of financial position for financial instruments are assigned to classes and categories. The carrying amounts for each category and class and the fair values for each class are presented in the table below for fiscal year 2018/19:

31 January 2019	Category pursuant to IFRS 9					
	At amortised cost	Fair value through profit or loss	No category according to IFRS 9	Not within the scope of IFRS 7	Carrying amount	Fair value
EUR k						
<b>Assets</b>						
Equity and debt instruments	0	51,060	0	0	51,060	51,060
Trade receivables	2,318,400	234,224	0	0	2,552,624	2,552,624
Loans to and receivables from associates or related parties	1,660	0	0	0	1,660	1,660
Other loans	420,286	0	0	0	420,286	421,403
Derivative financial assets without hedge accounting	0	8,289	0	0	8,289	8,289
Other financial assets	94,317	0	0	0	94,317	94,317

Cash and cash equivalents	152,845	0	0	0	152,845	152,845

The carrying amounts for each category and class and the fair values for each class are presented in the table below for fiscal year 2017/18:

31 January 2018	Category pursuant to IAS 39					Carrying amount	Fair value
	Loans and receivables	Available-for-sale financial assets	Held-for-trading financial assets	No category according to IAS 39.9	Not within the scope of IFRS 7		
<b>EUR k</b>							
<b>Assets</b>							
Available-for-sale financial assets	0	38,070	0	0	0	38,070	38,070
Available-for-sale financial assets at acquisition cost	0	2,717	0	0	0	2,717	n/a
Trade receivables	2,693,278	0	0	0	0	2,693,278	2,693,278
Loans to and receivables from associates or related parties	9,012	0	0	0	0	9,012	8,951
Other loans	80,026	0	0	0	0	80,026	81,705
Derivative financial assets without hedge accounting	0	0	1,648	0	0	1,648	1,648
Other financial assets	125,059	0	0	0	0	125,059	125,059
Lease receivables	0	0	0	5,537	0	5,537	n/a
Cash and cash equivalents	104,415	0	0	0	0	104,415	104,415

Equity and debt instruments mainly include shares in unlisted companies and interests in limited partnerships. Shares in listed companies are measured at the market price as of the reporting date. For other equity and debt instruments, the fair value is determined using a multiplier method (revenue multiple, level 3). This uses individually derived multipliers between 0.54 and 1.39 (31 January 2018: between 0.54 and 1.39). A 10% increase in the multipliers would increase the value by EUR 5,299k (31 January 2018: EUR 5,010k); a 10% decrease in the multipliers would decrease the value by EUR 5,300k (31 January 2018: EUR 5,008k).

Derivatives are carried at fair value.

Due to the short-term maturities of cash and cash equivalents (level 1), receivables, and other current financial assets (level 2), their carrying amounts generally approximate their fair values at the reporting date.

The fair values of loans to and receivables from associates or related entities, other loans, held-to-maturity financial assets, and other non-current financial assets due after more than one year correspond to the net present value of the payments related to the assets based on the current interest rate parameters and yield curves (level 2).

The carrying amounts for each category and class of financial liabilities and the fair values for each class are presented in the table below for fiscal year 2018/19.

31 January 2019	Category pursuant to IFRS 9					
	At amortised cost	Fair value through profit or loss	No category according to IFRS 9	Not within the scope of IFRS 7	Carrying amount	Fair value

Derivative financial liabilities without hedge accounting	0	2,521	0	0	2,521	2,521	

<sup>1)</sup> Prior-year figures were restated due to the finalisation of purchase price allocations.

The fair value of the bonds is the nominal value multiplied by the quoted price as of the reporting date (level 1).

Derivatives are carried at fair value (level 2).

The fair value of liabilities to banks corresponds to the present value of the payments associated with the liabilities (level 2).

The fair value of liabilities to associates and related parties corresponds to the present value of payments to be made calculated using a customary market discount rate (level 2).

Due to the short-term maturities of trade payables, liabilities for customer rebates and bonuses, ABS and factoring liabilities, loans and other current financial liabilities, their carrying amounts generally approximate the fair values at the reporting date (level 2).

The fair value of other financial liabilities measured at fair value (contingent consideration from business combinations) is determined using the purchase price formula agreed in the purchase agreements (level 3).

#### Fair value hierarchy of financial instruments

PHOENIX applies the following fair value hierarchy to define and present its financial instruments measured at fair value:

Level 1: Quoted (unadjusted) prices in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3: Techniques that use inputs that are not based on observable market data.

EUR k	Financial instruments measured at fair value			Total
	Level 1	Level 2	Level 3	
<b>31 January 2019</b>				
Equity and debt instruments	0	0	51,060	51,060

### Net gains or losses on each category of financial instruments

EUR k	FY 2018/19
Financial assets measured at amortised cost	-21,479
Financial liabilities measured at amortised cost	-2,982
Financial instruments measured at fair value	13,572
	<b>-10,889</b>

EUR k	FY 2017/18
Loans and receivables	-6,911
Available-for-sale financial assets	5,786
thereof recognised in accumulated other comprehensive income	3,841
thereof recognised through profit or loss	1,945
Financial liabilities measured at amortised cost	-106
Financial instruments held for trading	-3,373
	<b>-4,604</b>

The presentation of net gains or losses does not include interest income and expenses on the respective financial instruments.

Interest from financial instruments is recognised in interest income and expenses. Foreign exchange effects and fair value changes of derivatives are recognised in the other financial result from derivatives. Impairment losses were recognised as follows in the period:

EUR k	FY 2017/18
Trade receivables	14,952
Loans to and receivables from associates	300
Other loans	2,616
Other financial assets	7
	<b>17,875</b>

Offsetting within financial assets breaks down as follows:

EUR k	Gross amount of financial assets	Gross amount of financial liabilities	Net amount of financial assets reported in the statement of financial position
<b>31 January 2019</b>			
Trade receivables (current)	2,590,256	- 37,941	2,552,315
Other financial assets (current)	648,654	- 147,593	501,061
<b>31 January 2018</b>			
Trade receivables (current)	2,697,582	- 4,320	2,693,262
Other financial assets (current)	319,289	- 152,228	167,061

Offsetting within financial liabilities breaks down as follows:

EUR k	Gross amount of financial liabilities	Gross amount of financial assets	Net amount of financial liabilities reported in the statement of financial position
<b>31 January 2019</b>			
Trade payables (current)	3,724,905	- 111,670	3,613,235
<b>31 January 2018</b>			
Trade payables (current)	3,308,377	- 38,805	3,269,572

The table below presents the nominal and market values of the derivative financial instruments:

EUR k	31 January 2018		31 January 2019	
	Nominal amount	Market value	Nominal amount	Market value
<b>Assets</b>				
Derivatives held for trading				
Foreign currency contracts	420,350	1,648	648,919	8,289
<b>Liabilities</b>				
Derivatives held for trading				
Foreign currency contracts	371,381	2,292	204,423	5,733
Interest rate transactions	2,471	229	2,119	187

## 27 Financial risk management and derivative financial instruments

### Objectives and principles of the financial risk management

Due to its multinational business activities, PHOENIX is exposed to financial risks. In particular, these include market risk (changes in foreign exchange rates, interest rates and prices) and credit risk. In addition, liquidity risks may arise due to the operating business, due to the financial risks named above and because of unexpected fluctuations in the financial markets.

These risks are monitored using comprehensive planning, approval and reporting structures and an early warning system, which together make up the risk management system of PHOENIX. Binding guidelines with regard to financial risks are prepared by the central areas Corporate Finance and Asset Management and Corporate Controlling and Accounting. These guidelines and requirements must be approved by the management board specifying how financial risks are to be controlled. The management is informed on an ongoing basis about the current risk exposure and the development on the global financial markets.

Derivatives are used by PHOENIX in specific cases to hedge against interest rate and currency risks. They are concluded only with banks with a high credit standing. These derivatives are regularly measured and their value in use continually and diligently monitored. Although the derivatives are contracted for hedging purposes, they are classified as held-for-trading under IFRS 9.

Only a small number of persons is authorised to trade with derivatives. The trading, control and reporting functions are separate and independent from each other. This control is employed strictly according to binding internal guidelines that utilise a two-person principle. The conclusion or disposal of derivatives is only allowed in accordance with the internal treasury guidelines of PHOENIX.

**Market risk****Currency risk**

Currency risk arises through fluctuations of the exchange rate of foreign currencies and their impact on the items of the statement of financial position which are not denominated in the functional currency. The currency risks for PHOENIX originate primarily from internal financing activities and investments in foreign entities. As the group entities largely settle their operating business in their respective functional currency, the operative currency risks are small.

Currency risks arise in the course of intragroup financing whenever loans are extended to group entities in currencies other than the euro. These currency risks are hedged by concluding forward exchange contracts with banks.

In the calculation of the currency exposure for the sensitivity analysis, those items of the statement of financial position are taken into account which are not in the functional currency of the respective reporting company. Those items of the statement of financial position are aggregated for the whole group. Additionally, the internal loans which are not in the functional currency of the reporting unit are taken into account and the amounts aggregated. The currency effects for a 10% increase (decrease) of the euro against the respective currency are then measured. In the next step, the market value changes of derivative financial instruments (currency swap transactions and forwards), which were entered into to hedge these exposures, were calculated under the assumption of a 10% increase (decrease) of the spot exchange rates as of the closing date.

Finally, the hypothetical effect on profit or accumulated other comprehensive income of the sensitivity analysis was calculated by netting the effects of the assumed 10% increase (decrease) in the value of the euro against all other currencies as per 31 January 2019 for both the underlying and derivative financial instruments. The material results of the sensitivity analysis are as follows:

If the EUR depreciates (appreciates) by 10% against the HRK, profit before tax would be EUR 3,418k (prior year: EUR 2,893k) higher (lower). This is primarily due to trade payables.

If the EUR depreciates (appreciates) by 10% against the MKD, profit before tax would be EUR 1,980k (prior year: EUR 1,641k) higher (lower). This effect results from internal loans.

If the EUR depreciates (appreciates) by 10% against the NOK, accumulated other comprehensive income would be EUR 44,740k (prior year: EUR 44,740k) higher (lower). This effect stems from internal loans classified as a net investment in a foreign operation.

If the EUR depreciates (appreciates) by 10% against the RON, profit before tax would be EUR 1,880k (no prior year) higher (lower). This effect stems from trade payables.

If the EUR depreciates (appreciates) by 10% against the RSD, profit before tax would be EUR 2,940k (prior year: EUR 2,153k) and accumulated other comprehensive income would be EUR 9,411k (prior year: EUR 7,722k) higher (lower). This results from the trade payables and the internal loans that are classified as a net investment in a foreign operation.

If the DKK depreciates (appreciates) by 10% against the NOK, profit before tax would be EUR 414k (prior year: EUR 1,231k) higher (lower). This is primarily due to trade receivables.

If the DKK depreciates (appreciates) by 10% against the SEK, profit before tax would be EUR 999k (prior year: EUR 1,396k) higher (lower). This is primarily due to trade receivables.

### Interest rate risk

Interest rate risks exist as a result of potential changes in the market interest rate and may lead to a change in fair value in the case of fixed interest-bearing financial instruments and to fluctuations in interest payments in the case of variable interest-bearing financial instruments. As of 31 January 2019, there was only one interest option (collar) to hedge against increasing reference interest rates at an agreed minimum interest rate from 2010/11. This was accounted for as a derivative held for trading.

For financial instruments with fixed interest that are measured at amortised cost, changes in market interest rates have no impact on the earnings and equity. With regard to variable interest-bearing financial instruments, changes in market risk rates impact the earnings and are thus considered in the sensitivity analysis.

The interest sensitivity analysis presented below shows the hypothetical effects which a change in the market interest rate at the reporting date would have had on the pre-tax result. It assumes that the exposure at the reporting date is representative of the year as a whole.

The fixed-interest periods of PHOENIX as of the reporting date are largely balanced. A positive parallel shift in the EUR market yield curve by 50 basis points as of the reporting date (prior year: 50 basis points) would impact net debt subject to floating interest rates, leading to a negative impact of EUR 1,953k (prior year: EUR 2,667k) on the profit before tax. Because the reference interest rate (Euribor) was negative on the reporting date, a further negative shift in the market interest curve by 50 basis points would have had no material effect on net debt subject to floating interest rates.

A positive (negative) parallel shift of 50 basis points for the EUR interest rate curves, assuming other interest rate curves and exchange rates remain constant, would have a negative (positive) effect of EUR 414k (EUR 416k) on profit before tax on account of the interest derivatives in the portfolio as of the reporting date. In the prior year, the positive (negative) shift for the EUR yield curve by 50 basis points would have resulted in a negative (positive) effect of EUR 544k (EUR 546k).

For the interest rate collar in the portfolio, a positive (negative) parallel shift of 50 basis points (prior year: 50 basis points) for the EUR interest rate curves would have a positive (negative) effect of EUR 32k (EUR 33k) on profit before tax. In the prior year, the positive (negative) shift for the EUR yield curve would have resulted in a positive (negative) effect of EUR 43k (EUR 44k).

**Credit risk**

From the group's perspective, credit risk describes the risk that a party to a financial instrument will fail to meet its contractual obligations and thus cause a financial loss for the group. Credit risk comprises both the direct default risk and the risk that the creditworthiness of the counterparty will deteriorate, as well as the concentration of risks. The group is exposed to credit risk from its operating activities, from certain financial transactions and from the granting of financial guarantees for bank loans for pharmacy customers, mainly in Austria and the United Kingdom.

The maximum exposure of financial assets to credit risk is equal to the carrying amount of each class of financial assets plus the nominal volume of financial guarantee contracts issued.

The level of credit risk from operating activities is monitored and kept in check by an accounts receivable management system. Due to the structure of our customers, the risk of default is assessed to be rather low in the group. This is because our customers – which, in the wholesale segment, are mostly pharmacies – generally have a high credit standing. Despite some larger customers, our customer base is widely diversified with small amounts of receivables allocable to each individual customer. In the course of liberalisation of the pharmacy markets in Europe, however, pharmacy chains and new sales channels are increasingly emerging, creating a large number of major customers with a higher level of receivables outstanding. In addition, the group holds in some cases promissory notes from customers, pledged assets of pharmacies, mortgages and other personal guarantees as collateral for loans to pharmacies in the form of goods supplied. Collateral was utilised to an immaterial extent in the fiscal year.

For the measurement of expected credit losses on trade receivables and lease receivables, PHOENIX applies the simplified approach provided by IFRS 9. According to this standard, at initial recognition as well as at every subsequent reporting date, a risk provision is recognised in the amount equal to the lifetime ECL. The risk provision is determined separately for individual customer groups. Initially, the average default rates per customer group are determined using the historical default rates of the last three years in the respective countries. The historical default rates are then adjusted for developments expected in future. PHOENIX applies the CDS rate of the respective country as a relevant factor, which it uses to calculate a minimum default rate. At the same time, the CDS rate serves as the basis for determining the rate of loss for receivables from public institutions.

Based on this, the loss allowances on trade receivables and lease receivables as of 31 January 2019 is determined as follows:

31 January 2019		Pharmacies	Hospitals	Health insurance companies	Other	Individual loss allowance	Total
Expected credit loss	in %	1.1	1.4	1.1	2.5	15.5	
Trade receivables, gross	in EUR k	1,607,078	197,551	51,841	199,701	386,101	2,442,272
Lease receivables, gross	in EUR k				13,650	0	13,650
<b>Loss allowance</b>	<b>in EUR k</b>	<b>17,418</b>	<b>2,842</b>	<b>553</b>	<b>5,410</b>	<b>59,859</b>	<b>86,082</b>

Loans granted are subdivided into the following default risk classes:

Class	Description	Basis for the expected credit loss	Expected credit loss in %	Carrying amount (before loss allowance) EUR k
Performing	Debtor has a low credit risk	12-month ECL	0.1	368,634
Underperforming	Default risk has increased significantly	Lifetime ECL	5.6	43,822
Non-performing	Default event has occurred	Lifetime ECL (individual loss allowance)	72.3	38,085
Write-off	Recoverability is not expected	Financial instrument is derecognised	100.0	0

The cash investments are spread between various banks with a high credit standing in order to avoid any concentration of risk. PHOENIX has a policy of only entering into derivatives with banks with a high credit standing and thus limits the default risk for derivatives with a positive market value. As PHOENIX spreads the derivatives between more than ten of our core banks, there is no concentration of risks of default with a single bank. Additionally, PHOENIX monitors very closely the financial news and markets and has therefore an early warning system to detect possible difficulties on the part of a bank.

### Liquidity risk

Liquidity risk describes the risk that a company cannot fulfil its financial obligations when they become due. To monitor the group's liquidity, PHOENIX has implemented a daily rolling liquidity planning system. Additionally, regular discussions are held for special liquidity issues and developments as part of a rolling 12-month liquidity plan. Subsidiaries are integrated into the group's central financing system.

The table below shows the contractually agreed undiscounted interest payments and repayments of non-derivative financial liabilities and derivative financial assets and liabilities as of 31 January 2019.

EUR k	Cash flows 2019/20	Cash flows 2020/21	Cash flows 2021/22 – 2023/24	Cash flows 2024/25 – 2028/29	Cash flows > 2029/30
Liabilities to banks	144,474	6,833	173,718		
Bonds	16,625	310,375	202,417		
Loans	119,033				
Trade payables	3,613,235				
Liabilities to associates and related parties	54,193				
ABS/factoring liabilities	213,799				
Other financial liabilities	26,905	5,722	4,819		
Finance lease liabilities	6,761	1,220	1,322	187	
Financial guarantee contracts	86,258				
Derivative financial liabilities without hedge accounting					
Cash outflow	206,904	51	72	2	
Cash inflow	– 204,063				
Total derivatives	2,841	51	72	2	

The table presented includes financial liabilities under the liabilities item of the statement of financial position in conjunction with assets held for sale.

The contractually agreed undiscounted payments as of 31 January 2018 are presented in the table below:

EUR k	Cash flows 2018/19	Cash flows 2019/20	Cash flows 2020/21 – 2022/23	Cash flows 2023/24 – 2027/28	Cash flows > 2028/29
Liabilities to banks	187,183	7,705	97,212	75,403	
Bonds	16,625	16,625	523,890		
Loans	118,916				
Trade payables	3,269,572	2			
Liabilities to associates and related parties	404		49,007		
Liabilities and provisions for customer rebates and bonuses	33,119				
ABS/factoring liabilities	415,366				
Other financial liabilities	19,848	639	5,617		
Finance lease liabilities	6,649	745	1,908	502	
Financial guarantee contracts	76,674				
Derivative financial liabilities without hedge accounting					
Cash outflow	373,842	71	109	17	
Cash inflow	– 371,304				
Total derivatives	2,538	71	109	17	

Liabilities with early termination rights have been classified according to the first call date. For variable interest payments, the current floating interest rate is taken as a basis. Payments in foreign currency are translated using the exchange rate at year-end.

## 28 Notes to the cash flow statement

Cash and cash equivalents amounted to EUR 152,845k at the end of the reporting period (prior year: EUR 104,415k) and comprised cash of EUR 152,832k (prior year: EUR 104,401k) as well as cash equivalents of EUR 13k (prior year: EUR 14k). Restricted cash at the end of the period amounts to EUR 9,050k (prior year: EUR 12,368k) and corresponds to security deposits for revolving credit lines (e.g., ABS and factoring). There are also restrictions on cash and cash equivalents of EUR 17,884k (prior year: EUR 15,162k) of foreign subsidiaries at the end of the period since local covenants or other agreements do not allow the subgroups to transfer those amounts directly or indirectly via other subsidiaries to the parent company.

Payments of EUR 160,726k (prior year: EUR 40,106k) made for acquisitions of consolidated entities and business units correspond to the payments of the purchase price less any cash and cash equivalents acquired of EUR 11,839k (prior year: EUR 1,262k). Cash received from the sale of consolidated entities and business units correspond to the sale proceeds received of EUR 353k (prior year: EUR 12,192k) less cash and cash equivalents disposed of EUR 0k (prior year: EUR 0k).

The reconciliation of finance lease liabilities is as follows:

EUR k	As of 1 February 2018	Thereof non- financing activities	Changes in cash	Change in the basis of consol- idation	Exchange rate changes	Off-balance	Other	As of 31 January 2019
Bonds/loans from banks	825,205		-74,589	34,401	-510		314	784,821
ABS/factoring liabilities	414,954							213,607
ABS/factoring receivables	-30,834							-58,728
ABS/factoring net liabilities	384,120		7,344		1,043	-237,500	-128	154,879
Lease liabilities	8,838		-982	1,057	-41		219	9,091
Other liabilities	227,740	20,002	-117	300	-51		-49,787	198,087

EUR k	As of 1 February 2017	Thereof non- financing activities	Changes in cash	Change in the basis of consol- idation	Exchange rate changes	Off-balance	Other	As of 31 January 2018
Bonds/loans from banks	926,514	926,514	-122,178		1,232		19,637	825,205
ABS/factoring liabilities	533,882							414,954
ABS/factoring receivables	-40,262							-30,834
ABS/factoring net liabilities	493,620	493,620	-63,002		-5,691	493	-41,300	384,120
Lease liabilities	9,414	9,414	-544		-17		-15	8,838
Other liabilities	246,084	228,474	-1,146	215	166		31	227,740

## 29 Related party disclosures

### General

In accordance with IAS 24, entities or persons, which are in control of or controlled by PHOENIX must be disclosed. Members of the Merckle family and entities controlled by them are considered as related parties. The ultimate controlling party of PHOENIX is Mr. Merckle. In addition, the disclosure requirements of IAS 24 comprise persons and entities over which PHOENIX has significant influence or joint control.

### Transaction volume

The goods and services sold as well as other income from transactions with related parties and goods and services received as well as other expenses from such transactions break down as follows:

EUR k	Goods and services sold as well as other income in the fiscal year		Goods and services received as well as other expenses in the fiscal year	
	2017/18	2018/19	2017/18	2018/19
<b>Partners</b>	<b>0</b>	<b>20,830</b>	<b>13,272</b>	<b>16,357</b>
from financing	0	19,802	106	1,036
from leases, other services	0	1,028	13,166	15,321
<b>Associates</b>	<b>16,797</b>	<b>14,582</b>	<b>9,696</b>	<b>4,726</b>
from financing	105	0	0	0
from leases, other services	64	35	9,696	4,726
from goods sold	16,628	14,547	0	0
<b>Other related parties</b>	<b>2</b>	<b>0</b>	<b>2,599</b>	<b>2,596</b>
from financing	0	0	872	711
from leases, other services	2	0	1,727	1,885
from goods sold	0	0	0	0

The goods and services sold mainly consist of goods supplied and other services.

The goods and services received relate primarily to goods, leases, and financing transactions.

**Outstanding balances**

EUR k	Receivables as of 31 January		Liabilities as of 31 January	
	2018	2019	2018	2019
<b>Partners</b>	<b>206</b>	<b>350,581</b>	<b>64,296</b>	<b>53,652</b>
from financing	0	350,581	49,008	38,089
from leases, other services	206	0	15,288	15,563
<b>Associates</b>	<b>4,001</b>	<b>1,132</b>	<b>88</b>	<b>0</b>
from financing	2,296	0	0	0
from leases, other services	18	3	88	0
from goods sold	1,687	1,129	0	0
<b>Other related parties</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>66</b>
from financing	0	0	0	0
from leases, other services	0	0	0	66
from goods sold	0	0	0	0
<b>Loss allowances</b>	<b>-225</b>	<b>0</b>	<b>0</b>	<b>0</b>

For the most part, the outstanding balances are not secured nor have guarantees been issued on them. The receivables were settled by payment or by netting them against accounts payable.

In connection with the bond issued in July 2014, related parties hold bond certificates with a nominal volume of EUR 112,400k. In connection with the bond issued in 2013, related parties hold bond certificates with a nominal volume of EUR 30,200k. To the extent that these bond certificates are still held, interest was paid at the prevailing terms and conditions.

In the reporting year, PHOENIX International Beteiligungs GmbH sold an equity investment including treasury shares to PHOENIX Pharma SE at a market price of EUR 428,584k. The entire purchase price was initially granted as a loan. As of 31 January 2019, this loan amounts to EUR 344,984k. Interest of EUR 3,730k has accrued on the loan in the reporting period. Deconsolidation of the equity investment resulted in a loss of EUR 5,272k.

In September 2018, PHOENIX Pharma SE contributed its shares in PHOENIX International Beteiligungs GmbH of 2.33% to PHOENIX Pharmahandel GmbH & Co KG without receiving consideration in return.

In October 2018, the partners of PHOENIX Pharmahandel GmbH & Co KG waived their receivables from the payment of interest of additional contributions of EUR 192,175k.

Related parties granted loans totalling EUR 660,000k to PHOENIX in the reporting period, which were repaid within the reporting period. Interest expenses of EUR 743k were accrued thereon.

Real estate acquisition tax of EUR 4,000k was incurred in fiscal year 2017/18 following restructuring measures initiated by the partners. This was recognised as a withdrawal by the partners.

#### **Terms and conditions**

Unless terms and conditions of related party transactions have been commented on specifically above, they were made on an arm's length basis. Outstanding balances at year-end are unsecured and settled by payment.

#### **30 Remuneration of the members of the management board**

The total expense for remuneration of the management board in the reporting period was EUR 9,361k (prior year: EUR 7,117k) and is classified as short-term employee benefits, of which EUR 885k relate to the prior year (prior year: EUR 293k).

The current service cost for benefits earned by management in the reporting period was EUR 424k (prior year: EUR 408k).

Former members of management received remuneration (prior year: including severance payments and non-competition payments) of EUR 772k in the reporting year (prior year: EUR 356k). Pension provisions of EUR 28,496k (prior year: EUR 28,303k) were recognised.

#### **31 Remuneration of the advisory board**

Remuneration of the advisory board amounted to EUR 539k in the fiscal year (prior year: EUR 350k).

Translation of the German independent auditor's report concerning the audit of the consolidated financial statements and group management report prepared in German.

# INDEPENDENT AUDITOR'S REPORT

To PHOENIX Pharmahandel GmbH & Co KG, Mannheim

## Report on the audit of the consolidated financial statements and of the group management report

### Opinions

We have audited the consolidated financial statements of PHOENIX Pharmahandel GmbH & Co KG, Mannheim, and its subsidiaries (the group) which comprise the consolidated statement of financial position as of 31 January 2019, the consolidated income statement, the consolidated statement of comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the fiscal year from 1 February 2018 to 31 January 2019, and the notes to the consolidated financial statements, including a summary of significant accounting policies. In addition, we have audited the group management report of PHOENIX Pharmahandel GmbH & Co KG for the fiscal year from 1 February 2018 to 31 January 2019.

In our opinion, on the basis of the knowledge obtained in the audit,

- the accompanying consolidated financial statements comply, in all material respects, with the IFRSs as adopted by the EU, and the additional requirements of German commercial law pursuant to Sec. 315e (1) HGB ["Handelsgesetzbuch": German Commercial Code] and, in compliance with these requirements, give a true and fair view of the assets, liabilities, and financial position of the group as of 31 January 2019, and of its financial performance for the financial year from 1 February 2018 to 31 January 2019, and
- the accompanying group management report as a whole provides an appropriate view of the group's position. In all material respects, this group management report is consistent with the consolidated financial statements, complies with German legal requirements and appropriately presents the opportunities and risks of future development.

Pursuant to Sec. 322 (3) Sentence 1 HGB, we declare that our audit has not led to any reservations relating to the legal compliance of the consolidated financial statements and of the group management report.

### Basis for the opinions

We conducted our audit of the consolidated financial statements and of the group management report in accordance with Sec. 317 HGB and in compliance with German Generally Accepted Standards for Financial Statement Audits promulgated by the Institut der Wirtschaftsprüfer [Institute of Public Auditors in Germany] (IDW). Our responsibilities under those requirements and principles are further described in the "Auditor's responsibilities for the audit of the consolidated financial statements and of the group management report" section of our auditor's report. We are independent of the group entities

in accordance with the requirements of German commercial and professional law, and we have fulfilled our other German professional responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinions on the consolidated financial statements and on the group management report.

#### **Responsibilities of the executive directors and the advisory board for the consolidated financial statements and the group management report**

The executive directors are responsible for the preparation of the consolidated financial statements that comply, in all material respects, with IFRSs as adopted by the EU and the additional requirements of German commercial law pursuant to Sec. 315e (1) HGB, and that the consolidated financial statements, in compliance with these requirements, give a true and fair view of the assets, liabilities, financial position, and financial performance of the group. In addition, the executive directors are responsible for such internal control as they have determined necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the executive directors are responsible for assessing the group's ability to continue as a going concern. They also have the responsibility for disclosing, as applicable, matters related to going concern. In addition, they are responsible for financial reporting based on the going concern basis of accounting unless there is an intention to liquidate the group or to cease operations, or there is no realistic alternative but to do so.

Furthermore, the executive directors are responsible for the preparation of the group management report that, as a whole, provides an appropriate view of the group's position and is, in all material respects, consistent with the consolidated financial statements, complies with German legal requirements, and appropriately presents the opportunities and risks of future development. In addition, the executive directors are responsible for such arrangements and measures (systems) as they have considered necessary to enable the preparation of a group management report that is in accordance with the applicable German legal requirements, and to be able to provide sufficient appropriate evidence for the assertions in the group management report.

The advisory board is responsible for overseeing the group's financial reporting process for the preparation of the consolidated financial statements and of the group management report.

#### **Auditor's responsibilities for the audit of the consolidated financial statements and of the group management report**

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and whether the group management report as a whole provides an appropriate view of the group's position and, in all material respects, is consistent with the consolidated financial statements and the knowledge obtained in the audit, complies with the German legal requirements and appropriately presents the opportunities and risks of future development, as well as to issue an auditor's report that includes our opinions on the consolidated financial statements and on the group management report.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Sec. 317 HGB and in compliance with German Generally Accepted Standards for Financial Statement Audits promulgated by the Institut der Wirtschaftsprüfer (IDW) will always detect a material misstatement. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements and this group management report.

We exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements and of the group management report, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinions. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit of the consolidated financial statements and of arrangements and measures (systems) relevant to the audit of the group management report in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of these systems.
- Evaluate the appropriateness of accounting policies used by the executive directors and the reasonableness of estimates made by the executive directors and related disclosures.
- Conclude on the appropriateness of the executive directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in the auditor's report to the related disclosures in the consolidated financial statements and in the group management report or, if such disclosures are inadequate, to modify our respective opinions. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the group to cease to be able to continue as a going concern.

- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements present the underlying transactions and events in a manner that the consolidated financial statements give a true and fair view of the assets, liabilities, financial position and financial performance of the group in compliance with IFRSs as adopted by the EU and the additional requirements of German commercial law pursuant to Sec. 315e (1) HGB.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the group to express opinions on the consolidated financial statements and on the group management report. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinions.
- Evaluate the consistency of the group management report with the consolidated financial statements, its conformity with [German] law, and the view of the group's position it provides.
- Perform audit procedures on the prospective information presented by the executive directors in the group management report. On the basis of sufficient appropriate audit evidence we evaluate, in particular, the significant assumptions used by the executive directors as a basis for the prospective information, and evaluate the proper derivation of the prospective information from these assumptions. We do not express a separate opinion on the prospective information and on the assumptions used as a basis. There is a substantial unavoidable risk that future events will differ materially from the prospective information.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.
